Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Public Finance Section, Public Institutions Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-8561) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Preface

This is a new publication. For the first time the Public Institutions Division is publishing twenty-six years of government revenue and expenditure statistics for the federal, provincial and local governments in Canada based on a common universe, classification, concepts and methods. Also included are consolidated revenues and expenditures, which provide indication of the total size of government by eliminating intergovernmental revenues expenditures. This is the first time the Division is making available comprehensive statistics for all three levels of government in one volume. For the first time, using one Statistics Canada publication the user will be able to trace the size, structure and composition of governments in Canada as reflected by their financial statistics.

This publication presents data on the basis of the Financial Management System. The accounting systems of the various governments in Canada are designed to measure the financial parameters of those governments. They reflect the data needs and structures of the different governments, which can vary widely. Accordingly, the financial data published in public accounts, budgets, estimates and other records of individual governments are not directly comparable. The Financial Management System uses these data sources, classifies them on a consistent and presents financial information for governments on a basis which is comparable between governments and over a period of time. This is the only available source of data which provides details on the functional distribution of government expenditures. In order to illustrate the links between the Public Accounts and the FMS, this publication includes for each province, a reconciliation table for 1991/92.

The Public Institutions Division collects data on the basis of a "public sector universe". This universe encompasses all organizations, whether commercial or non-commercial, under the control of a government. The universe is divided into two major groupings of entities: those falling under the category of "government" and those that are considered to be "government business enterprises". This publication the revenues and expenditures governments. The Concepts, Coverage, Methods and Data Quality section of this publication discusses the public sector universe concept and outlines which components of government are currently covered by the FMS revenue and expenditure statistical program.

Avant-propos

Il s'agit ici d'une nouvelle publication. La Division des institutions publiques publie pour la première fois statistiques sur les recettes et les dépenses administrations fédérale, provinciales et locales qui couvrent vingt-six années reposant sur une classification, méthodes, des concepts et un univers communs. présente également les recettes et les dépenses consolidées, qui donne un aperçu de la taille globale administrations en éliminant les recettes et les dépenses intergouvernementales. La Division publie donc pour la première fois, en un seul volume, des statistiques détaillées sur les trois niveaux de gouvernement. Pour la première fois, l'utilisateur ne devra consulter qu'une seule publication de Statistique Canada pour obtenir des données sur la taille, la structure et la composition des administrations publiques au Canada, par le biais de leurs statistiques financières.

Cet ouvrage, présente des données sur la base du système de gestion financière. Les méthodes comptables employées dans les différentes administrations publiques au Canada sont conçues pour mesurer les diverses variables financières de ces administrations. Elles traduisent les besoins en données et les structures des administrations publiques qui varient d'ailleurs grandement. Ainsi, les données financières publiées dans les comptes publics, les budgets, les estimations et d'autres registres des administrations ne sont pas directement comparables. Dans le cadre du système de gestion financière, les différentes sources de données sont classées selon des critères d'uniformité et présentées de façon à ce qu'on puisse établir des comparaisons entre les administrations et sur une période de temps donnée. Ceci est la seule source de données des administrations publiques par fonction. De plus, afin d'illustrer le lien entre les comptes publics et le SGF, des tableaux de rapprochement pour 1991-1992 sont inclus pour chacune des administrations publiques.

La Division des institutions publiques recueille des données en fonction de l'"univers du secteur public" qui comprend toutes les entreprises, commerciales ou non, qui relèvent de l'État. L'univers comporte deux principaux groupes d'entités: celles qui entrent dans la catégorie des "administrations publiques" et celles qui entrent dans la catégorie des "entreprises publiques". La publication présente les recettes et les dépenses de l'État. La partie qui porte sur les concepts, le champ d'observation, les méthodes et la qualité des données fournit une explication de l'univers du secteur public et présente les composantes de l'État que couvre le programme de statistiques sur les recettes et les dépenses du SGF.

This publication contains a historical revision of data, covering the period 1965/66 to 1990/91 for all three levels of government and for consolidated government statistics. This provides a consistent data series for this period. Thus, this publication revises data published previously in the FMS publications dealing with individual levels of government. The elements of the revision are described in the Concepts, Methods and Data Quality section.

Beginning in 1992/93 there will be an annual publication containing the most recent data on revenues and expenditures of each level of government and consolidated data.

Cette publication contient une révision des données historiques couvrant la période allant de 1965-1966 à 1990-1991, tant pour chaque niveau de gouvernement que pour les statistiques consolidées, ce qui permet d'obtenir des données uniformes pour cette période. Ainsi, pour chaque niveau d'administration publique, cette publication contient des révisions aux données déjà diffusées dans les publications SGF. Le travail de révision est décrit dans la partie sur les concepts, les méthodes et la qualité des données.

Dès 1992-1993, nous diffuserons une publication annuelle qui présentera les plus récentes données sur les recettes et les dépenses pour chaque niveau de gouvernement ainsi que les données consolidées.

Highlights

This publication contains data on the revenues and expenditures of the federal, provincial and local governments in Canada for the period between 1965/66 to 1991/92 as well as two different consolidations of these data: (1) consolidated federal, provincial and local and (2) consolidated provincial and local statistics for the period between 1965/66 and 1990/91.

At the time of the preparation of this publication, the federal and some provincial governments presented new financial statements indicating that there would be substantial revisions to revenue and expenditure estimates for 1991/92. The estimates presented in this publication are, however, based on the last detailed set of budgets and estimates presented in the spring and early summer of 1991.

In this volume, revenues are broken down by source (income taxes, consumption taxes, etc.) and expenditures by function. These statistics allow the user to trace the growth of government in Canada over time as well as changes in structure and composition of government revenue and expenditure. The paragraphs below outline the general trends in consolidated federal, provincial and local government revenue and expenditure from 1965/66 to 1990/91. The analysis of consolidated data over this period allows the user an overview of the financial trends of all governments in Canada combined. These patterns are reflected in Text Table 1.

- Consolidated total revenue for the federal, provincial and local governments grew from \$16.7 billion in 1965/66 to \$274.6 billion in 1990/91 for an average annual growth rate of 11.8%. Consolidated total expenditure for the three levels of government rose from \$17.2 billion in 1965/66 to \$309.5 billion in 1990/91 for an average annual growth rate of 12.3%. Over the same period, Canada's Gross Domestic Product increased from \$57.5 billion to \$671.6 billion, at an average annual rate of growth of 10.3%.
- Income taxes represent the largest component of consolidated total revenue and rose from 35.3% of total revenue in 1965/66 to 43.8% in 1990/91.
- Health and social insurance levies was another component of total revenue that showed significant growth over the period, having increased from 4.2% of total revenue in 1965/66 to 8.1% in 1990/91.

Faits saillants

La publication présente des données sur les recettes et les dépenses des administrations fédérale, provinciales et locales au Canada pour la période allant de 1965-1966 à 1991-1992, ainsi que des statistiques fédérales, provinciales, locales consolidées et des statistiques provinciales, locales consolidées pour la période allant de 1965-1966 à 1990-1991.

Pendant que nous préparions la publication, l'administration fédérale et certaines administrations provinciales ont présenté des nouveaux états financiers et ont indiqué que des révisions majeures seraient apportées aux estimations sur les recettes et les dépenses pour 1991-1992. Les données présentées ici sont, néanmoins, fondées sur les estimations et les budgets détaillés présentés au printemps et au début de l'été de 1991.

Dans cet ouvrage, les recettes sont réparties selon la source (impôts sur le revenu, taxes à la consommation, etc.), et les dépenses, selon la fonction. Cette répartition permet à l'utilisateur de suivre l'expansion de l'État dans le temps, ainsi que les changements dans la structure et la composition des recettes et des dépenses publiques. On trouve au paragraphe suivant les tendances dans les recettes et les administrations dépenses consolidées des provinciales et locales pour la période allant de 1965-1966 à 1990-1991. L'analyse des données agrégées pour cette période fournit à l'utilisateur un aperçu des tendances au niveau des finances de l'ensemble des administrations publiques canadiennes. Les tendances sont présentées au tableau explicatif 1.

- Les recettes totales consolidées des administrations fédérale, provinciales et locales ont augmenté pour passer de \$16.7 milliards en 1965-1966 à \$274.6 milliards en 1990-1991, soit un taux de croissance annuel moyen de 11.8%. Les dépenses totales consolidées de l'ensemble des administrations publiques ont progressé pour passer de \$17.2 milliards en 1965-1966 à \$309.5 milliards en 1990-1991, un taux de croissance annuel moyen de 12.3%. Au cours de la même période, le produit intérieur brut du Canada a grimpé pour passer de \$57.5 milliards à \$671.6 milliards, soit un taux de croissance annuel moyen de 10.3%.
- L'impôt sur le revenu représente la plus forte composante des recettes totales. Il est passé de 35.3% des recettes totales consolidées en 1965-1966 à 43.8% en 1990-1991.
- La part des cotisations aux régimes d'assurance-maladie et d'assurance sociale ont également augmenté au cours de la période, passant de 4.2% des recettes totales en 1965-1966 à 8.1% en 1990-1991.

- The proportion of consolidated total revenue for all three levels of government coming from consumption taxes declined from 29.9% in 1965/66 to 20.3% in 1990/91. Property and related taxes also declined as a proportion of total revenue from 12.6% in 1965/66 to 8.4% in 1990/91.
- Debt charges, health and social service expenditure functions were the three most rapidly growing components of expenditure with average annual growth rates, between 1965/66 and 1990/91, of 15.5%, 13.6% and 13.1% respectively.
- Debt charges' share grew from 9.9% of total expenditure in 1965/66 to 20.3% in 1990/91. Health expenditures represented 9.9% of consolidated total expenditure in 1965/66 and 13.4% in 1990/91 while social services increased from 18.0% to 21.7% in the same time interval.
- Education, protection of persons and property, and transportation and communications functions showed significant declines as proportions of consolidated total expenditure. Education's share fell from 17.4% to 11.9% between 1965/66 and 1990/91; protection of persons and property expenditures decreased as a proportion of total expenditure from 13.4% to 7.6% and transportation and communications dropped from 12.8% to 4.9%.

- La proportion des recettes totales consolidées des trois niveaux de gouvernement provenant des taxes à la consommation a chuté pour passer de 29.9% en 1965-1966 à 20.3% en 1990-1991. Les impôts fonciers et impôts connexes ont également diminué en pourcentage des recettes totales pour passer à 8.4% en 1990-1991 par rapport à 12.6% en 1965-1966.
- Au niveau des dépenses, les trois composantes du service de la dette, des services de santé et des services sociaux ont progressé le plus rapidement avec des taux de croissance annuels moyens de 15.5%, 13.6% et 13.1% respectivement, de 1965-1966 à 1990-1991.
- La part du service de la dette a grimpé pour passer de 9.9% des dépenses totales en 1965-1966 à 20.3% en 1990-1991. Les dépenses au titre de la santé ont représenté 9.9% des dépenses totales consolidées en 1965-1966 et 13.4% en 1990-1991. Les services sociaux ont progressé pour passer de 18.0% à 21.7% au cours de la même période.
- Les fonctions de l'éducation, de la protection de la personne et de la propriété, des transports et des communications ont affiché des chutes importantes en pourcentage des dépenses totales consolidées. La part de l'éducation est passée de 17.4% à 11.9% de 1965-1966 à 1990-1991. La part de la protection de la personne et de la propriété est passée de 13.4% à 7.6%, et celle des transports et des communications, de 12.8% à 4.9%.

Local government data are on a calendar year basis.

Includes interest from provincial government enterprises related to direct borrowings of provincial governments made on their behalf. Annex 1 indicates the amount of interest received from provincial government enterprises for the fiscal years 1982/83 to 1991/92.

Totals may not add due to rounding.

Les données des administrations locales sont sur une base annuelle

Comprend les intérêts versés par les entreprises publiques provinciales sur des emprunts directs effectués par les administrations provinciales en leur nom. L'annexe 1 présente les intérêts reçus des entreprises publiques provinciales pour les exercices allant de 1982/83 à 1991/92. Les totaux peuvent ne pas faire le compte exact à cause de l'arrondissement des données

Les données des administrations locales sont sur une base annuelle.

Comprend les intérêts sur des emprunts directs effectués par les administrations provinciales au nom de leurs entreprises publiques. L'annexe 1 présente les intérêts versés au nom de leurs entreprises publiques pour les exercices allant de 1982/83 à 1991/92

Les totaux peuvent ne pas faire le compte exact à cause de l'arrondissement des données

Les données des administrations locales sont sur une base annuelle

Comprend les intérêts sur des emprunts directs effectués par les administrations provinciales au nom de leurs entreprises publiques. L'annexe 1 présente les intérêts versés au nom de leurs entreprises publiques pour les exercices allant de 1982/83 à 1991/92
Les totaux peuvent ne pas faire le compte exact à cause de l'arrondissement des données.

Local government data are on a calendar year basis.

Includes interest from provincial government enterprises related to direct borrowings of provincial governments made on their behalf. Annex 1 indicates the amount of interest received from provincial government enterprises for the fiscal years 1982/83 to 1991/92.

Totals may not add due to rounding.

ERRATA

Note to Users

This errata reflects final adjustments to Québec provincial government data that were not reflected in **some** statistical tables of the publication. In addition, the column containing 1991 Yukon Local Government Revenue Estimates which incorrectly reflected those of the Northwest Territories has been corrected. Pages 56, 57 and 79 of the publication have been reproduced and the **few numbers** that have been changed are in bold and italics.

Data released on CANSIM on the same day as the release of this publication are correct.

ERRATA

Note à l'intention des utilisateurs

Les présentes corrections tiennent compte des derniers ajustements aux données administratives provinciales du Québec qui ne fiqurent pas dans certains tableaux statistiques de la publication. En outre, une rectification a été apportée à la colonne des estimations des recettes de l'administration locale du Yukon pour 1991 qui renfermait par erreur les estimations des Territoires du Nord-Ouest. Les pages 56, 57 et 79 de la publication ont été reproduites et les quelques chiffres modifiés sont indiqués en caractères gras et en italique.

Les données parues dans CANSIM le jour de la diffusion de la présente publication sont correctes.

CONCEPTS, COVERAGE, METHODS AND DATA QUALITY

The purpose of this section is to provide information on concepts, coverage and methods used to prepare the federal, provincial, local as well as consolidated government revenue and expenditure statistics. Information is also provided on the quality of data and other issues related to the statistics reported in this publication. The data presented in this publication are based according to the Financial Management System (FMS).

1. CONCEPTS

1.1 Public Sector

The public sector of Canada includes all organizations, both commercial and non-commercial, under the control of a government body. This new definition makes the universe of the government sector identical in the System of National Accounts (SNA) and the Financial Management System (FMS).

For statistical purposes, the public sector universe provides the framework within which to observe the extent of government's involvement in the production of goods and services, as well as its role in resource allocation. The framework for public sector statistics is in keeping with the recommendations on public sector accounts by the United Nations Statistical Office. For these purposes, the public sector consists of all transactors (organizations) controlled by government.

The public sector universe, as defined by Statistics Canada, is divided into two main components: Governments and Government Business Enterprises. The Government component includes departments, agencies, boards, commissions, municipalities and special funds established and controlled by governments; public educational institutions; cultural facilities; hospitals and social agencies; and the bodies administering universal pension plans.

Government Business Enterprises are organizations engaged in commercial operations. They are similar to private business enterprises, but are controlled by government. They are either in competition with similar organizations in the private sector, or they monopolize markets that would otherwise be serviced by the private sector.

CONCEPTS, CHAMP D'OBSERVATION, MÉTHODES ET QUALITÉ DES DONNÉES

L'objet de la présente section est de fournir des renseignements sur les concepts, le champ d'observation et les méthodes ayant servi à établir les statistiques sur les recettes et les dépenses des administrations fédérale, provinciales, locales et consolidées. On y trouve aussi de l'information sur la qualité des données et d'autres questions ayant trait aux statistiques qui figurent dans la présente publication. Les données dont il est fait état dans cette publication sont fondées sur le Système de gestion financière (SGF).

1. CONCEPTS

1.1 Secteur public

Le secteur public du Canada comprend tous les organismes, commerciaux ou non, qui relèvent d'un organisme public. Grâce à cette nouvelle définition, l'univers du secteur public utilisé dans le contexte du Système de comptabilité nationale (SCN) est identique à celui du Système de gestion financière (SGF).

À des fins statistiques, l'univers du secteur public fournit l'infrastructure dont on se sert pour observer l'importance de la participation des administrations publiques eu égard à la production de biens et de services, ainsi que leur rôle dans l'affectation des ressources. L'infrastructure utilisée pour les statistiques du secteur public est conforme aux recommandations se rapportant aux comptes du secteur public, faites par le Bureau de Statistique des Nations-Unies. À ces fins, le secteur est composé de tous les agents économiques (organismes) contrôlés par une administration publique.

L'univers du secteur public, tel que défini par Statistique Canada, est divisé en deux composantes principales : les administrations publiques et les entreprises publiques. La composante des administrations publiques comprend les ministères, les organismes, les conseils, les commissions, les municipalités et les fonds spéciaux établis et contrôlés par des administrations, les établissements d'enseignement publics, les installations culturelles, les hôpitaux et les organismes de services sociaux, ainsi que les organismes qui administrent les régimes universels de pensions.

Les entreprises publiques sont des organismes qui effectuent des opérations commerciales. Elles ressemblent aux entreprises du secteur privé, mais elles sont contrôlées par une administration publique. Elles font concurrence à des entreprises semblables du secteur privé où elles monopolisent des marchés qui seraient, autrement, desservis par le secteur privé.

1.2 Statistics Canada's Financial Management System

Statistics Canada's Financial Management System (FMS) contains standardized financial statistics for all agencies and levels of government in Canada. It has been developed over the past 50 years by Statistics Canada in co-operation with representatives of all levels of government, the academic community and business. Through the years, as government activities and user requirements for government financial data have changed, the FMS has been continually updated and improved.

Governments and their agencies report their financial activities in a variety of forms, among them detailed annual reports, budgets and quarterly summaries. Since these reports reflect the structure and accounting methods of the government or agency concerned, the way in which governments produce their financial statistics is not uniform.

The FMS is a standardized system describing the expenditures as services provided and the revenues raised to cover these expenditures as source of funds. The FMS also indicates the effects that an imbalance between revenues and expenditures may have on the government's financial assets and liabilities.

There are advantages in combining financial information from various sources in a single statistical system. First, the statistics produced through the FMS are uniform over long periods of time, which provides a fuller understanding of the changes in government financial operations. In addition, the FMS makes it easy to compare the financial statistics of various governments at the same and different levels.

1.3 Accounting Practices

In the FMS, data for the government portion of the public sector are produced on a modified cash basis. The modified cash system records transactions when the monies are spent or received. At the end of the accounting period, however, major transactions which have been completed (except for receipt or disbursement of money) may be accrued as receivables or payables. For example, a government may actually not pay salaries and wages covering the last week of the fiscal year until the first week of the following fiscal year. For the government business enterprise portion, generally accepted accounting principles for profit-oriented business as established by the Canadian Institute of Chartered Accountants are followed.

1.2 Le Système de gestion financière de Statistique Canada

Le Système de gestion financière (SGF) de Statistique Canada comporte des statistiques financières normalisées se rapportant à tous les organismes et paliers d'administration au Canada. Il a été mis au point au cours des 50 dernières années par Statistique Canada avec la collaboration des représentants de tous les paliers d'administration, du milieu universitaire et du monde des affaires. Au fil des ans, au fur et à mesure de l'évolution des activités gouvernementales et des besoins des utilisateurs, le SGF a été constamment mis à jour et amélioré.

Les administrations publiques et leurs organismes déclarent leurs activités financières de diverses manières, notamment en établissant des rapports annuels détaillés, des budgets et des sommaires trimestriels. Étant donné que ces rapports sont le reflet des structures et des méthodes comptables de l'administration publique ou de l'organisme en question, la façon dont les administrations produisent leurs statistiques financières varie.

Le SGF est un système normalisé qui décrit les dépenses comme étant les services assurés, et les recettes perçues pour couvrir ces dépenses comme étant des sources. De plus, le SGF détermine les conséquences que peut avoir le déséquilibre entre les recettes et les dépenses sur l'actif financier et le passif de l'administration publique.

Le fait de regrouper des renseignements financiers provenant de diverses sources en un seul système statistique présente certains avantages. D'abord, les statistiques produites conformément au SGF sont uniformes sur de longues périodes, ce qui permet de mieux comprendre l'évolution des activités financières gouvernementales. En outre, le SGF permet de comparer facilement les données financières des différentes administrations, au même niveau ou à des niveaux différents.

1.3 Pratiques comptables

Dans le cadre du SGF, les statistiques pour la partie des administrations publiques du secteur public sont produites sur une base de comptabilité de caisse modifiée. Dans ce système, des opérations sont inscrites quand les sommes sont dépensées ou reçues. Toutefois, à la fin de la période comptable, les opérations importantes qui sont terminées (abstraction faite de la rentrée ou du décaissement d'argent) sont inscrites comme sommes à recevoir ou à payer. Par exemple, il se peut qu'une administration ne verse pas réellement des salaires et des traitements pour la dernière semaine de l'exercice financier avant la première semaine de l'exercice financier suivant. Pour la partie des entreprises publiques, on adopte les principes comptables généralement reconnus pour les entreprises à but lucratif, tels qu'établis par l'Institut canadien des comptables agrées.

2. COVERAGE

The Public Institutions Division's Government Revenue and Expenditure program covers all elements or components of federal, provincial, territorial and local governments in Canada that are unshaded in Chart 2, a chart of the public sector universe. Although the chart indicates that provincial public hospitals are not part of the current coverage the impact on total government revenue and expenditure, as a result of their eventual inclusion, will only be to the extent that their total revenue exceeds the transfers they receive from governments (i.e. own source revenue). Transfers from governments to hospitals, which are included in government expenditure, are the major source for hospital revenue. At the federal government level the Canada Pension Plan and non-trusteed employee pension plans are not yet covered. Since the last publication, the Bank of Canada, Canada Post Corporation and the Foreign Exchange Fund have been re-classified as government enterprises. At the provincial and territorial level the Québec Pension Plan, non-trusteed employee pension plans and hospitals are not covered. At the provincial and local government levels, some special care facilities are not covered, and the coverage of all housing entities is not yet complete.

3. DATA SOURCES

Federal and Provincial

There are three cycles of data for the federal and provincial levels of governments: Estimates, Revised Estimates and Actual.

Estimates:

The estimates are derived from information contained in the estimates and budgets of the federal, provincial and territorial governments and from estimates of the special fund financial transactions as compiled by the Public Institutions Division, and the federal, provincial, and territorial governments.

Revised Estimates:

The revised estimates are derived from updated information contained in the budget speeches and the estimates of the next fiscal year reflecting revisions to the previous year's estimates of revenue and expenditure.

Actual:

The financial statistics on actual data are derived from information contained in the public accounts of the governments and from audited financial statements of their special funds. Additional detail is also obtained directly from provincial and territorial governments.

2. CHAMP D'OBSERVATION

Le programme de la Division des institutions publiques portant sur les recettes et les dépenses des administrations englobe l'ensemble des éléments ou des composantes des administrations fédérale, provinciales, territoriales et locales au Canada qui sont représentées au graphique 2 (Univers du secteur public) par des zones non ombrées. En dépit du fait qu'on ne tient pas compte dans le champ d'observation actuel des hôpitaux publics provinciaux, comme l'indique le diagramme, les répercussions de leur inclusion éventuelle sur les recettes et les dépenses globales des administrations publiques n'entrent en ligne de compte que dans la mesure où les recettes globales dépassent les transferts que ces établissements reçoivent des administrations (c'est-à-dire les recettes de sources propres). Les transferts des administrations publiques aux hôpitaux, qui sont compris dans les dépenses des administrations publiques, constituent la principale source des recettes des hôpitaux. Au niveau de l'administration fédérale, le champ d'observation ne s'étend pas encore au Régime de pensions du Canada et aux régimes de pensions des employés qui ne sont pas constitués en fiducie. Depuis la dernière publication, la Banque du Canada, la Société canadienne des postes et le Fonds des opérations de change ont été reclassifiés et font maintenant partie des entreprises publiques. À l'échelle provinciale et territoriale, le Régime de pensions du Québec, les régimes de pensions des employés non constitués en fiducie et les hôpitaux ne font pas non plus partie du champ d'observation. Pour ce qui est des administrations provinciales et locales, on ne tient pas compte de certains établissements de soins spéciaux dans le champ d'observation et on n'a pas encore réussi à inclure dans ce dernier toutes les unités de logement.

3. SOURCES DES DONNÉES

Niveaux fédéral et provincial

Aux niveaux des administrations fédérale et provinciales, il existe trois cycles de données : les estimations, les estimations révisées et les données réelles.

Estimations:

Les estimations sont fondées sur les renseignements qui figurent dans les estimations et les budgets des administrations fédérale, provinciales et territoriales et sur les estimations des opérations financières des fonds spéciaux rassemblés par la Division des institutions publiques et les administrations fédérale, provinciales et territoriales.

Estimations révisées :

Les estimations révisées proviennent des mises à jour apportées dans les discours du budget et les estimations du prochain exercice financier qui traduisent les révisions aux estimations des revenus et des dépenses de l'année précédente.

Données réelles :

Les statistiques financières se rapportant aux données réelles sont tirées des comptes publics des administrations et des états financiers vérifiés de leurs fonds spéciaux. Les administrations provinciales et territoriales constituent des sources de détails additionnelles.

Local

For the local level there are four data cycles, Estimates, two cycles of Revised Estimates and Actual.

Estimates:

Local government estimates are prepared from various data sources including a survey of local government budgetary intentions, other local government surveys, administrative documents of provincial and local governments, and information obtained from provincial government ministries and other divisions within Statistics Canada.

Revised Estimates:

The revised estimates are based on an annual survey of municipalities. Information on libraries, local schools and municipal hospitals are obtained from the Education, Culture and Tourism, Investment and Capital Stock and Health Divisions of Statistics Canada. PID conducts two revisions of local estimates for a given reference year.

Actual:

The financial statistics of the actual cycle are derived from annual reports produced by municipalities, provincial departments of Education or Municipal Affairs (or equivalent), and other local government entities. Information for local schools, libraries and municipal hospitals is obtained from the Education, Culture and Tourism Division and Health Division of Statistics Canada.

Consolidated

Estimates:

The estimates of revenue and expenditure are produced based on the FMS estimates for the federal, provincial and local governments. The data are adjusted to eliminate intergovernmental revenues and expenditures.

Revised Estimates:

The revised estimates of revenue and expenditure are produced based on the FMS revised estimates produced for the federal, provincial and local governments. The data are adjusted to eliminate intergovernmental revenues and expenditures.

Actual:

The actual revenue and expenditure data are produced based on the FMS actual revenue and expenditure for the federal, provincial and local governments. The data are adjusted to eliminate intergovernmental revenues and expenditures.

Niveau local

On retrouve à ce niveau quatre cycles de données: les estimations, deux cycles d'estimations révisées et les données réelles.

Estimations:

Les estimations de l'administration locale sont fondées sur diverses sources de données, notamment une enquête portant sur les projets budgétaires des administrations locales, d'autres enquêtes menées auprès des administrations locales, des documents administratifs des administrations provinciales et locales et des renseignements obtenus auprès des ministères provinciaux et d'autres divisions de Statistique Canada.

Estimations révisées :

Les estimations révisées sont fondées sur une enquête annuelle des municipalités. Les renseignements ayant trait aux bibliothèques, aux écoles locales et aux hôpitaux municipaux proviennent de la Division de l'éducation, de la culture et du tourisme, de la Division de la santé et de la Division de l'investissement et du stock de capital de Statistique Canada. Pour une année de référence donnée, la DIP effectue deux révisions des estimations locales.

Données réelles :

Les statistiques financières sur les données réelles sont tirées des rapports annuels préparés par les municipalités, les ministères provinciaux de l'éducation ou des affaires municipales (ou organismes équivalents) et autres entités locales gouvernementales. Les renseignements ayant trait aux écoles locales, aux bibliothèques et aux hôpitaux municipaux proviennent de la Division de l'éducation, de la culture et du tourisme et de la Division de la santé de Statistique Canada.

Données consolidées

Estimations:

Les estimations des revenus et des dépenses sont calculées en fonction des estimations du SGF au niveau des administrations fédérale, provinciales et locales. Ces données sont corrigées en vue d'éliminer les recettes et les dépenses intergouvernementales.

Estimations révisées :

Les estimations révisées des recettes et des dépenses sont fondées sur les estimations révisées du SGF au niveau des administrations fédérale, provinciales et locales. Ces données sont corrigées en vue d'éliminer les recettes et les dépenses intergouvernementales.

Données réelles :

Les données réelles se rapportant aux recettes et aux dépenses sont fondées sur les recettes et les dépenses réelles du SGF au niveau des administrations fédérale, provinciales et locales. Ces données sont corrigées en vue d'éliminer les recettes et les dépenses intergouvernementales.

4. METHODS

4.1 Classification

FMS uses a standardized classification framework for revenues and expenditures.

Revenue is classified by source and sub-source, either as revenues which a government derives from its own sources or as transfers from other governments.

Revenues derived by a government from its own sources are further classified by type:

from taxes (including levies for health and social insurance);

from natural resources;

from privileges, licences and permits;

from sales of goods and services;

from investments.

Revenues arising from transfers from other governments or their enterprises are further classified by transferor and by type; either general or specific. In all cases, the principal components of each main classification are identified.

Expenditures are classified by function, that is by either the main purpose of the expenditure or the service provided. Health, Education and Social Services are examples of functions. There are eighteen functions, most of which include a number of sub-functions.

4.2 Data Development

 a) Federal and Provincial Estimates and Revised Estimates

Data on government revenues and expenditures contained in the government budgets and estimates are classified and coded in accordance with the Financial Management System. The data are analyzed to identify and eliminate transactions between a government and its special funds or between special funds of the same government, otherwise known as interfund transactions. The elimination of interfunds is required in order to avoid the double counting of revenues and expenditures of a government.

In cases where a government has not provided an estimate of revenue and expenditure for a special fund, the data are estimated using previous years actual data and other information received from the government.

4. MÉTHODES

4.1 Classification

Le SGF classe les recettes et les dépenses en fonction d'une infrastructure normalisée.

Les recettes sont classées selon la source et la source secondaire, soit au titre des recettes qu'une administration publique tire de ses propres sources ou de transferts d'autres administrations.

Les recettes qu'une administration publique tire de ses propres sources sont en outre classées en fonction du type de provenance, c'est-à-dire selon qu'elles découlent :

Des taxes (y compris les taxes liées à la santé et à l'assurance-sociale)

Des ressources naturelles

Des privilèges, licences et permis

De la vente de biens et de services

Des placements

Les recettes qui proviennent de transferts effectués par d'autres administrations ou leurs entreprises sont également classifiées selon l'origine et le type, soit général ou spécifique. Dans tous les cas, les principales composantes de chaque catégorie principale sont définies.

Les dépenses sont classées selon la fonction, soit selon l'objet principal de la dépense ou le service fourni. Comme exemple de fonction, mentionnons la santé, l'éducation et les services sociaux. Il existe dix-huit fonctions, dont la plupart comprennent également un certain nombre de sous-fonctions.

4.2 L'élaboration des données

a) Estimations et estimations révisées des administrations fédérale et provinciales

La classification et le codage des données se rapportant aux recettes et aux dépenses administratives des budgets et des estimations des administrations sont conformes aux principes du Système de gestion financière. Les données sont soumises à une analyse en vue de cerner et d'éliminer les opérations effectuées entre une administration et un de ses fonds spéciaux ou entre les fonds spéciaux d'une même administration, qu'on qualifie par ailleurs d'opérations interfonds. Il est nécessaire d'éliminer ce type d'opération pour éviter le double compte des recettes et des dépenses d'une administration publique.

Dans le cas où une administration publique n'a pas fourni d'estimations des revenus et des dépenses d'un fonds spécial, les données sont estimées au moyen des données réelles des années précédentes et d'autres renseignements fournis par l'administration en question.

b) Federal and Provincial Actual

The procedures used for the estimates and revised estimates apply also to the compilation of actual data. However, the source documents used to produce actual data are the public accounts of the federal, provincial and territorial governments and the audited financial statements of their special funds (agencies). Additional information to the public accounts is also obtained from the governments to permit the detailed classification of revenues and expenditures according to the Financial Management System.

c) Local Estimates and Revised Estimates

Unlike the federal and provincial/territorial statistics, local government estimates and revised estimates are compiled from several data sources, the main ones being surveys of municipal governments conducted by Public Institutions Division.

Municipalities represent 70% of the approximately 7,400 entities in the FMS local government universe. Three hundred and seventy-nine municipalities outside Québec are surveyed each year to collect data on current and capital revenue and expenditure transactions. Municipal financial data for the approximately 1,800 municipal governments in Québec are collected and submitted to Public Institutions Division through the Québec Bureau of Statistics.

Municipalities included in the Public Institutions Division's surveys were selected on the basis of two criteria. Municipalities considered unique and therefore not representative were selected to be surveyed on a full coverage (self-representing or take-all) basis. This group included all municipalities in urban regions, most remaining cities, and other municipalities which constituted extremes during the process of forming homogeneous groups prior to sample selection.

The remaining municipalities were grouped essentially by type of corporation (cities, towns, villages, etc.) within each province with some groups sub-divided into size strata where required. In some provinces, certain types of smaller municipalities having minimal impact at provincial total level were removed from the possibility of sample selection. From the remaining homogeneous groups sample (take-some) municipalities were selected on a judgmental basis. With the exception of Alberta, there is no sample rotation and the same sample is used from year to year.

Estimates from the take-some municipalities are inflated with a raising factor calculated on the basis of population of the sampled municipalities versus the total population of the municipalities in each stratum. These data are then aggregated with the values from the self-representing municipalities to arrive at estimated revenue and expenditure values at the municipal level.

b) Données réelles aux niveaux fédéral et provincial

Pour établir les données réelles, on procède de la même manière que pour les estimations et les estimations révisées. Cependant, les documents de base dont on se sert pour produire les données réelles sont les comptes publics des administrations fédérale, provinciales et territoriales et les états financiers vérifiés de leurs fonds spéciaux (organismes). On obtient également des administrations publiques des renseignements qui viennent s'ajouter à ceux des comptes publics afin d'en arriver à une classification détaillée des recettes et des dépenses conformément au Système de gestion financière.

c) Estimations et estimations révisées au niveau local

À l'encontre des statistiques fédérales et provinciales (ou territoriales), les estimations et les estimations révisées au niveau local sont tirées de différentes sources de données dont les principales sont les enquêtes que mène la Division des institutions publiques auprès des administrations municipales.

Les municipalités représentent 70% des unités de l'univers de l'administration locale qui en compte 7,400. Chaque année, trois cent soixante-dix-neuf (379) municipalités à l'extérieur du Québec font partie de l'échantillon en vue de recueillir des données sur les opérations se rapportant aux recettes et aux dépenses courantes et de capital. Les statistiques financières d'environ 1,800 administrations municipales sont recueillies auprès du Bureau de la statistique du Québec qui les transmet à la Division des institutions publiques.

Les municipalités qui font l'objet des enquêtes de la Division des institutions publiques sont choisies en fonction de deux critères. Les municipalités considérées comme étant uniques et donc non représentatives ont été choisies pour faire l'objet d'une couverture complète (auto-représentatives ou tirage partiel). Ce groupe comprend toutes les municipalités qui font partie des régions urbaines, la plupart des villes restantes et d'autres municipalités qui représentaient des cas extrêmes au moment de l'établissement de groupes homogènes qui a précédé la sélection de l'échantillon.

Les municipalités restantes ont été essentiellement groupées selon le type de société (municipalités, villes, villages, etc.) dans chacune des provinces, certains groupes ayant été subdivisés en strates de taille, au besoin. Dans certaines provinces, certains types de municipalités plus petites ayant peu d'incidence sur les estimations provinciales globales ont été éliminées de l'échantillon. Les municipalités qui ont été sélectionnées parmi les groupes homogènes restants (tirage partiel) l'ont été à dessein. Sauf en Alberta, il n'y a pas de renouvellement de l'échantillon, ce qui signifie qu'on utilise le même échantillon d'année en année.

Les estimations se rapportant aux municipalités à tirage partiel sont ajustées au moyen d'un facteur d'extension fondé sur la taille de la population des municipalités échantillonnées par rapport à la population globale des municipalités dans chaque strate. Les estimations sont ensuite regroupées avec les valeurs des municipalités auto-représentatives afin d'obtenir les recettes et les dépenses municipales estimatives.

The survey municipal data are combined with estimates from administrative data for the smaller municipalities, with data for local elementary and secondary schools and with data for all other non-municipal local government entities to produce universe level estimates.

d) Local Actual

The financial statistics of the actual cycle are derived primarily from administrative documents. These include annual reports produced by municipalities, provincial departments of Education or Municipal Affairs (or equivalent), and other local government entities. This data may be augmented with detail information obtained through the above-mentioned surveys. Information for local schools and libraries is obtained from Statistics Canada's Education, Culture and Tourism Division while that for municipal hospitals is obtained from Health Division.

4.3 Consolidation

Consolidation implies the aggregation of all unduplicated transactions. This is accomplished by accumulating the costs of like services and the proceeds of like revenue sources and eliminating the transactions between the entities making up the particular statistical unit. Since provincial and territorial governments have varying degrees of delegated authority to local governments, the cost of services provided within their particular provincial or territorial jurisdiction and the revenue raised therefrom, can only be determined by consolidating their financial transactions with those of their respective local governments. The results facilitate inter provincial or territorial comparisons. Finally, the total cost of government services to the country and the revenue raised to finance them can only be measured if the federal government data are consolidated with those of the provinces and territories, and, their local governments.

The inter entity transactions which should be subject to elimination on consolidation are:

- transfer payments general and specific purpose;
- 2) purchases and sales of goods and services;
- 3) interest on debt or balances outstanding;
- 4) taxes paid by a government as an employer,
- 5) unrecovered sales tax paid on incidental purchases, and;
- 6) revenues raised by one entity for another.

Les données d'enquête sur les municipalités sont combinées aux estimations de données administratives relatives à de plus petites municipalités. Elles sont également combinées aux données d'écoles primaires et secondaires locales et à celles relatives à toutes les autres entités gouvernementales locales non municipales, afin de produire des estimations pour l'ensemble de l'univers.

d) Données réelles au niveau local

Les données financières du cycle actuel proviennent surtout de dossiers administratifs, notamment de rapports annuels produits par les municipalités, les ministères provinciaux de l'Éducation ou des Affaires municipales (ou organismes équivalents), et d'autres entités gouvernementales locales. Ces données peuvent être étayées des données obtenues des enquêtes susmentionnées. Les données concernant les écoles et les bibliothèques locales proviennent de la Division de l'éducation, de la culture et du tourisme de Statistique Canada; celles concernant les hôpitaux municipaux proviennent de la Division de la santé.

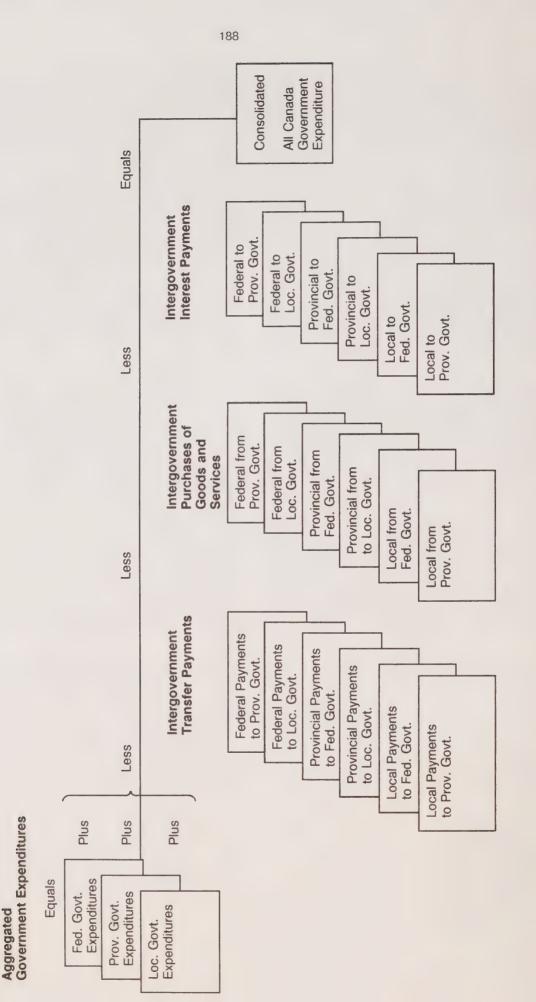

4.3 Consolidation

La consolidation comprend le regroupement de toutes les opérations sans double compte. Pour ce faire, on accumule les coûts des services similaires et les produits des sources de recettes similaires et on élimine les opérations intervenues entre les entités qui composent l'unité statistique particulière. Étant donné que le degré de pouvoir délégué par les administrations provinciales et territoriales aux administrations locales varie, le coût des services fournis dans une sphère de compétence provinciale ou territoriale particulière, de même que les recettes qui en découlent ne peuvent être déterminées qu'à l'issue de la consolidation des opérations financières avec les administrations locales respectives. Les statistiques ainsi obtenues facilitent également les comparaisons au niveau provincial ou territorial. Enfin, le coût global des services administratifs à l'échelle du pays et les recettes amassées en vue de les financer ne peuvent être mesurés qu'en consolidant les données de l'administration fédérale et celles des provinces et des territoires et de leurs administrations locales.

Les opérations entre entités dont il ne faut pas tenir compte dans la consolidation sont les suivantes :

- paiements de transfert effectués à des fins générales et particulières;
- 2) achats ou ventes de biens et de services;
- 3) intérêt de la dette ou soldes impayés;
- 4) impôts payés par l'administration en sa qualité d'employeur;
- 5) taxes de vente non récupérées au titre des achats complémentaires, et
- 6) recettes amassées par un organisme pour le compte d'un autre.

Data for Different Levels of Government

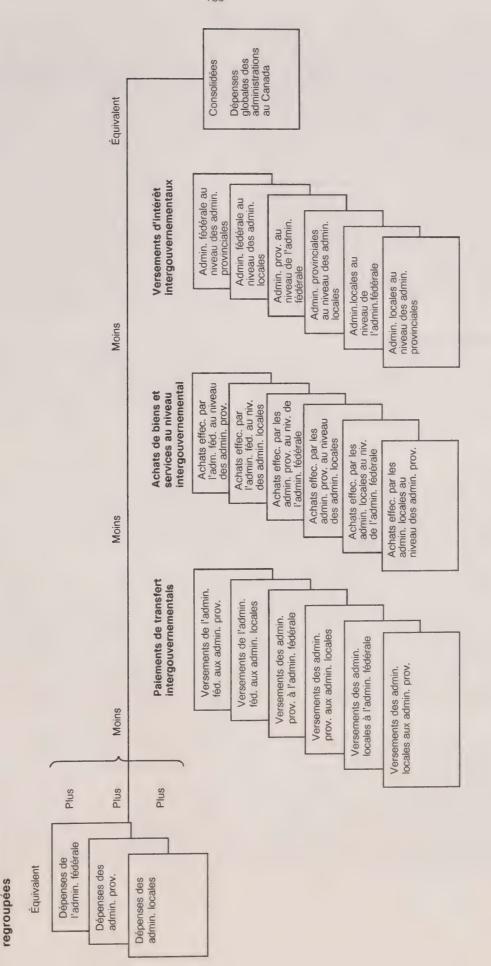

CALCUL DES DÉPENSES CONSOLIDÉES EN FONCTION DES DÉPENSES PUBLIQUES

Graphique 1

Données pour divers niveaux d'administration

Dépenses publiques

The transfer payments, general and specific purpose, are eliminated in the development of the consolidated statistical series. Inter-government purchases and sales of goods and services, to the extent they are distinguishable in the source data are also eliminated. Some payroll and similar levies paid by governments are not currently eliminated. Discussions are under way to determine if, through separate reporting or by estimation, the levels of such levies can be identified, at which time inter-government eliminations could be achieved. Unrecovered sales taxes undoubtedly are included in the revenue of the taxing authority and in the expenditure of the purchasers. Again the amount of such tax and its distribution is, at present, unknown to Statistics Canada. Should the information be made available or some satisfactory estimating technique developed, the amounts will be eliminated from consolidated revenue and expenditure. Chart 1 depicts the consolidation process in flow chart form.

4.4 The Historical Revision

This publication contains a section consisting of historical revenue and expenditure data for all three levels of government and for consolidated data from 1965/66 to 1991/92. This section reflects a historical revision of the data for those years. The major elements of the historical revision were as follows:

a) Federal

The data reflect the exclusion of the Bank of Canada, the Exchange Fund and Canada Post as they are now classified as government enterprises. The data also exclude the revenue and expenditure of the Canada Pension Plan and non-trusteed pension plans. The government's contributions to these plans as an employer as well as any interest paid to these plans are now included in government expenditure. The Unemployment Insurance Fund has been included as part of government for the years 1965/66 to 1969/70. Payments to the Province of Québec under the Established Programs (Interim Arrangement) Act have been revised from general purpose to specific purpose transfers under the functions of Health and Social Services for the period 1965/66 to 1973/74. Various other revisions have been made to provide comparable treatment of revenue and expenditure programs throughout the historical period.

b) Provincial

The data reflect the exclusion of the Québec Pension Plan, and non-trusteed government employee pension plans. The government's contributions to these plans as an employer as well as any interest paid to the plans are reflected in the government's expenditure. The Toronto Area Transit Authority was removed from coverage as it is a government enterprise. There were also minor revisions to the function classification of expenditures.

Les paiements de transfert, à des fins générales ou particulières, ne font pas partie des séries statistiques consolidées. Les achats ou les ventes de biens et de services au niveau intergouvernemental sont également éliminés dans la mesure où il est possible de distinguer ce type d'opération dans les données de base. À l'heure actuelle, on tient compte de certains prélèvements obligatoires sur la feuille de paye et de prélèvements similaires payés par le gouvernement. Des discussions sont en cours en vue de déterminer la possibilité d'établir, par la voie de comptes rendus séparés ou d'estimations, le niveau de ces prélèvements ce qui permettrait de procéder aux éliminations intergouvernementales. La taxe de vente non récupérée est indubitablement incluse dans les recettes de l'autorité fiscale et dans les dépenses des acheteurs. Encore une fois, Statistique Canada ignore, à l'heure actuelle, le montant de cette taxe de même que sa répartition. Si on parvient à se procurer ces renseignements ou à élaborer une technique d'estimation satisfaisante, ces montants seront éliminés des recettes et des dépenses consolidées. Le graphique 1 illustre le mécanisme de consolidation sous la forme d'un diagramme.

4.4 Révision historique

La présente publication renferme une section portant sur les recettes et les dépenses historiques pour les trois niveaux d'administration et pour les données consolidées de 1965-1966 à 1991-1992. La présente section tient compte de la révision historique des données se rapportant aux années susmentionnées. Les principaux éléments de cette révision sont les suivants :

a) Niveau fédéral

Les données tiennent compte de l'exclusion de la Banque du Canada, du Fonds des opérations de change et de la Société canadienne des postes, qui font maintenant partie des entreprises publiques. Les recettes et les dépenses rattachées au Régime de retraite du Canada et aux régimes de retraite non établis en fiducie sont également exclues. A l'heure actuelle, on tient compte dans les dépenses administratives de la contribution à ces plans des administrations, en leur qualité d'employeurs, de même que tout intérêt versé à ce chapitre. La caisse d'assurance-chômage fait partie du secteur administrations à partir des années 1965-1966 jusqu'à 1969-1970. Les paiements à la province de Québec aux termes de la Loi sur les programmes établis (arrangements provisoires) a fait l'objet d'une révision en fonction des transferts à des fins qui sont passées de générales à particulières, pour ce qui est des fonctions de la santé et des services sociaux, pour la période allant de 1965-1966 à 1973-1974. Diverses autres révisions ont été apportées pour assurer le traitement comparable des recettes et des dépenses pendant la période historique.

b) Niveau provincial

Les données tiennent compte de l'exclusion du Régime de rentes du Québec et des régimes de pensions non établis en fiducie des fonctionnaires. La contribution à ces régimes des administrations, en leur qualité d'employeurs, de même que tout intérêt versé au titre de ces régimes font partie des dépenses administratives. La Régie des transports en commun de la région de Toronto ne fait plus partie du champ d'observation étant donné qu'il s'agit d'une entreprise publique. On a également apporté d'autres révisions mineures à la classification des dépenses par fonction.

c) Local

The local government revenue and expenditure for the period 1965 to 1990 have been revised to reflect the following:

- the inclusion of reserve funds from 1965 through 1974 and revisions to revenues and expenditures of reserve funds from 1975 to 1978;
- the inclusion of own source revenues and their associated expenditures for local schools for 1965 and 1966;
- the inclusion of capital revenues and expenditures for local hospitals from 1965 through 1967;
- the inclusion of current revenues and expenditures for local hospitals from 1965 through 1970;
- 5) the inclusion of waterworks revenues and expenditures from 1965 through 1966;
- 6) the reclassification of expenditures on ambulance services from the protective services function to the health services function for the period 1965 to 1979.

d) Consolidated

The consolidated data have been revised to reflect the revisions made to the federal, provincial and local data as well as a number of adjustments to ensure consistent treatment of certain components over the period 1965/66 to 1990/91.

4.5 Inter-Provincial Comparability

The allocation of responsibilities between provincial and local authorities vary among provinces and territories particularly for certain areas of activity. Complete inter-provincial comparability can only be achieved when provincial government operations are consolidated with those of local government. The major examples of inter-provincial divergency of responsibility are as follows:

- In Newfoundland the costs of police protection is borne entirely by the province whereas in other provinces and territories there are significant expenditures by both levels of government.
- In Newfoundland and New Brunswick health and social welfare expenditures are almost exclusively provincial whereas in the other provinces and territories the local authorities are responsible for a share of the costs.

c) Niveau local

Les recettes et les dépenses des administrations locales pour la période allant de 1965 à 1990 ont été révisées afin de tenir compte des facteurs suivants :

- L'inclusion des fonds de réserve de 1965 à 1974 inclusivement et les révisions aux recettes et aux dépenses des fonds de réserve de 1975 à 1978.
- L'inclusion des recettes de sources propres et des dépenses associées pour ce qui est des écoles locales, pour 1965 et 1966.
- 3) L'inclusion des recettes et des dépenses de capital des hôpitaux locaux de 1965 à 1967.
- 4) L'inclusion des recettes et dépenses courantes des hôpitaux locaux de 1965 à 1970 inclusivement.
- 5) L'inclusion des recettes et des dépenses liées aux services d'aqueduc de 1965 à 1966.
- 6) La reclassification des dépenses se rapportant aux services d'ambulances de la fonction des services de protection à la fonction des services de santé, pour la période allant de 1965 à 1979.

d) Au niveau consolidé

Les données consolidées ont été révisées pour tenir compte des révisions apportées aux données fédérales, provinciales et locales de même que d'un certain nombre d'ajustements visant à garantir le traitement uniforme de certaines composantes pour la période allant de 1965-1966 à 1990-1991.

4.5 Comparabilité au niveau interprovincial

La répartition des responsabilités entre les autorités provinciales et locales diffère selon les provinces et les territoires, en particulier dans un certain nombre de secteurs d'activités. La consolidation des opérations des administrations provinciales et de celles des administrations locales est la seule façon d'en arriver à la comparabilité intégrale au niveau interprovincial. Les principaux exemples de la divergence des responsabilités au niveau interprovincial sont les suivants :

- À Terre-Neuve, les frais liés aux services de police sont entièrement assumés par la province tandis que dans les autres provinces et territoires ils constituent l'un des postes de dépenses important des deux niveaux d'administration.
- À Terre-Neuve et au Nouveau-Brunswick, les dépenses liées à la santé et au bien-être social sont presqu'entièrement du ressort provincial tandis que dans les autres provinces et territoires les autorités locales partagent les coûts.

- Elementary and secondary schools in New Brunswick are part of the provincial government structure and in Newfoundland such schools are operated privately. In the Yukon schools are operated by the territorial government and in the Northwest Territories they are also operated by the territorial government with the exception of two school districts in Yellowknife. In all other provinces schools are a significant component of local government.
- New Brunswick provincial government also has exclusive responsibility for municipal tax assessment and collection and elections.
- A number of provincial governments borrow directly on behalf of their government enterprises.
 As a result, the debt charges and investment income of those provinces represent a higher proportion of total expenditures and total revenue compared to other provinces. Annex 1 provides the details.

5. DATA QUALITY

Data quality is generally described in terms of sampling and non-sampling errors. Sampling error is the error that may be attributed because a survey is conducted instead of a census.

Non-sampling errors can occur in both censuses and sample surveys. They are difficult to measure and can arise during any of the survey activities. These errors stem from:

Coverage error:

Due to an incomplete listing and/or inadequate coverage of the population interest.

Response error:

Due to questionnaire design, inability or unwillingness of respondents to provide correct information; misinterpretation of questions due to definitional difficulties; conceptual problems.

Non-response error:

Some respondents may refuse to answer questions, some are unable or too late to respond. Data for non-responding units can be imputed using data from responding units or with data from a previous period. The extent of this error is generally unknown and usually increases with the non-response rate. Attempts are therefore made to achieve as high a response rate as possible.

Processing error:

These are errors that may occur at the various data processing steps; coding, data entry, verification, editing, tabulation, etc.

- Au Nouveau-Brunswick, les écoles primaires et secondaires font partie de la structure administrative provinciale, et à Terre-Neuve, les écoles fonctionnent sur une base privée. Les écoles du Yukon et des Territoires du Nord-Ouest relèvent des administrations territoriales à l'exception de deux districts scolaires de Yellowknife. Dans toutes les autres provinces, les écoles constituent une composante importante des administrations locales.
- L'administration provinciale du Nouveau-Brunswick assume en outre la responsabilité exclusive de l'établissement des rôles, de la perception des impôts et des élections au niveau municipal.
- Un certain nombre d'administrations provinciales empruntent directement au nom de leurs entreprises publiques. Par conséquent, les frais de la dette et les recettes de placement de ces provinces représentent une proportion plus élevée des dépenses et des recettes globales comparativement à d'autres provinces. Les détails pertinents figurent à l'annexe 1.

5. QUALITÉ DES DONNÉES

La qualité des données est généralement définie en termes d'erreurs aléatoires et d'observation. L'erreur aléatoire est celle qui peut être attribuable au fait qu'on a mené une enquête plutôt qu'un recensement.

Les erreurs d'observation peuvent survenir à la fois dans le contexte des recensements et des enquêtes-échantillons. Elles sont difficiles à évaluer et peuvent survenir à n'importe quelle étape des activités d'enquête. Ces erreurs découlent des facteurs suivants :

Erreur de couverture :

Attribuable au fait que les listes sont incomplètes et (ou) à la couverture inadéquate de la population.

Erreur de réponse :

Attribuable à la conception du questionnaire, au fait que les répondants sont incapables de fournir des renseignements corrects ou qu'ils ne veulent pas le faire, à la mauvaise interprétation des questions qui s'explique par des difficultés au niveau des définitions, à des problèmes conceptuels.

Erreur de non-réponse :

Il se peut que certains répondants refusent de répondre à des questions, que certains soient incapables d'y répondre ou que d'autres fournissent des données trop tard. Il est possible d'imputer les données se rapportant aux unités non déclarantes en se servant des données des unités déclarantes ou des données d'une période antérieure. En général, on ne connaît pas l'étendue de ce type d'erreur qui s'accroît généralement en fonction du taux de non-réponse. Par conséquent, on tente de faire en sorte que le taux de réponse soit aussi élevé que possible.

Erreur de traitement :

Il s'agit d'erreurs qui peuvent survenir aux diverses étapes du traitement des données: codage, saisie des données, vérification, correction, totalisation, etc.

Federal and Provincial

Federal and provincial data are entirely based on censuses of administrative documents (public accounts, budgets, estimates, etc.). Furthermore, the estimates and actual cycles of federal and provincial data are reconciled to those data on a public accounts basis and the reconciliation statements are made available at the time of the official release of the data. Examples of reconciliation statements are contained in Section 2 of this publication.

Local

Since the major data source for local estimates and revised estimates is survey data, sampling error is a factor in data quality. Sampling error in the municipal surveys has been reduced through the sample selection and edit processes. The criteria for sample selection detailed in section 4.2 outlined the development of a structured sample created for each province (excluding Québec). This sample can range from 7% to 100% in terms of the number of municipalities surveyed in a province or territory. The resultant data, however, represents between 50% and 100% of the total municipal revenue or expenditure for each province and territory. At the Canada total level, the municipal survey data represents about 48% of total local government data and about 84% if local school data is excluded.

Local government actual data are compiled from administrative documents. While the possibility of production of reconciliation tables has been examined, the considerable number of inputs into the series makes this an unrealistic goal at present.

A concerted effort has been made to minimize non-sampling errors regarding the data in this publication: through continuous updating of the universe; survey questionnaires have been designed to reduce misinterpretation by respondents; careful editing practices are employed during and after data capture; an effort has been made to reduce non-response and respondent burden; ongoing communication is maintained with data suppliers; and when possible, survey data are compared to administrative records to help detect significant changes in the data.

Niveaux fédéral et provincial

Les données fédérales et provinciales proviennent exclusivement d'enquêtes portant sur les documents administratifs (comptes publics, budgets, estimations, etc.). En outre, on effectue le rapprochement des estimations et des données fédérales et provinciales des cycles actuels avec les comptes publics. Les états de rapprochement sont disponibles au moment de la diffusion officielle des données. Vous trouverez à la Section 2 de la présente publication des exemples d'état de rapprochement.

Niveau local

Comme les données d'enquête sont la principale source pour les estimations locales et les estimations révisées, l'erreur d'échantillonnage influe sur la qualité des données. L'erreur aléatoire des enquêtes municipales a été réduite grâce au processus de sélection et de vérification de l'échantillon. Les critères de sélection énoncés à la partie 4.2 favorisent l'élaboration d'un échantillon structuré pour chaque province, à l'exclusion du Québec. Cet échantillon peut compter de 7% à 100% des municipalités observées dans une province ou un territoire. Les données résultantes, toutefois, représentent de 50% à 100% des recettes et dépenses municipales totales d'une province ou d'un territoire. Pour l'ensemble du Canada, les données municipales d'enquête représentent environ 48% des données de l'ensemble des administrations locales et environ 84% de ces données, si les données sur les écoles locales sont exclues.

Les données réelles des administrations locales sont rassemblées à partir de documents administratifs. Bien que nous avons examiné la possibilité de produire des tableaux de rapprochement, le nombre considérable d'entrées dans les séries en font un objectif irréalisable pour l'instant.

Des efforts concertés ont été déployés pour réduire au minimum les erreurs d'observation dans le cas des données qui figurent dans la présente publication. Pour ce faire, l'univers fait l'objet d'une mise à jour permanente, les questionnaires d'enquête sont conçus pour réduire la possibilité que les répondants les interprètent mal, des vérifications minutieuses ont été effectuées pendant et après la saisie des données, le taux de non-réponse et le fardeau des répondants ont été réduits, la communication permanente avec les fournisseurs de données a été assurée et, au besoin, les données d'enquête ont été comparées aux enregistrements administratifs pour cerner les divergences importantes.

Consolidated Revenue and Expenditure

The public sector comprises three levels of government. Each of these levels carries on its own particular set of financial transactions, both with the private sector and with other levels of government. Thus, intergovernment transactions must be eliminated so we are left with only those transactions occurring between the government and the general public. Such eliminations would be simple and straight forward if amounts reported as paid by one government equalled the related amounts shown as received by another government. This is not, however, the case for several reasons, such as inadequate identification in the source documents of one or the other side of transactions or of both, differing year-ends, time lags and varying government accounting approaches. In order to overcome such difficulties and minimize their impact upon the consolidated data, general guidelines have been developed so that the data may reflect financial flows between the government and the general population as accurately as possible. These guidelines are set out in the above mentioned System of Financial Management Statistics as well as in changes that have been recently brought to it.

accordance with these guidelines, certain adjustments are made when the amounts reported by the governments concerned are not identical. As a basis for adjustment, we consider the amount which constitutes the actual inflow of funds to government on the revenue side and, on the expenditure side, the portion of those funds which is returned to the general public. In practice, the adjustments are made as follows: differences among amounts reported by levels of government, which need to be adjusted, are considered as "receivables" or "payables", as the case may be, assuming that they are mainly due to various dates of accounting. In other words, it is assumed that the payments concerned are in transit. As a result, such a method of adjustment links the consolidation of revenue and expenditure with the consolidation of assets and liabilities.

Also, while every effort has been made to eliminate inter-government interest on debt, it has not yet been possible to identify and eliminate all inter-government interest on debt.

Recettes et dépenses consolidées

Le secteur public comprend trois niveaux d'administration. Chacun de ces niveaux effectue sa propre série particulière d'opérations financières, à la fois avec le secteur privé et avec d'autres niveaux d'administration. Il est donc nécessaire d'éliminer les opérations entre administrations et de retenir uniquement celles qui s'effectuent entre l'État et la collectivité. Cette élimination serait facile si les montants versés et reçus étaient les mêmes dans les états financiers des administrations publiques concernées. Mais tel n'est pas le cas pour plusieurs raisons, notamment parce que les documents de référence ne fournissent pas de renseignements complets ou précis sur l'un ou l'autre aspect d'une même opération ou sur les deux, et aussi parce que les diverses administrations publiques ne clôturent pas leur année financière aux mêmes dates et qu'en plus elles n'ont pas le même système comptable. Pour contourner la difficulté et en atténuer l'effet sur les chiffres consolidés, des principes directeurs ont été établis de façon que les données ne reflètent, avec le plus de précision possible, que les opérations financières entre l'État et la collectivité. Ces principes sont énoncés dans le Système des statistiques de la gestion financière susmentionné, ainsi que dans les modifications qui ont été apportées récemment.

Selon ces lignes directrices, certains rajustements sont effectués lorsque les montants déclarés par administrations en cause ne sont pas identiques. Nous prenons comme base de rajustement le montant qui, du côté des recettes, constitue la rentrée réelle de fonds pour l'Etat et, du côté des dépenses, la partie de ces fonds qui retourne à la collectivité. En pratique, les rajustements s'opèrent comme suit: les divergences dans les montants comptabilisés par les divers ordres d'administrations publiques sont considérées comme "débitrices" ou "créditrices" selon le cas, pourvu qu'elles soient principalement attribuables à des écarts de date entre les inscriptions comptables observées. En d'autres termes, nous supposons que les montants en cause sont en "transit". Par conséquent, cette méthode de rajustement rattache la consolidation des recettes et des dépenses à la consolidation de l'actif et du passif.

En outre, bien que nous n'ayons ménagé aucun effort pour éliminer, au niveau intergouvernemental, l'intérêt de la dette, il n'a pas encore été possible de définir et d'éliminer toutes les sommes s'y rapportant au niveau intergouvernemental.

Comparability with Other Statistical Systems

The FMS provides a standardized accounting of finances at all levels of government. The accounting systems used by individual governments are usually not comparable because each reflects the policies and structures of each government. The FMS also goes beyond the entities presented in budgets to include other agencies or special funds that perform governmental functions. The FMS data do not accord precisely with data on a public accounts basis published by the provincial and federal governments. Section 2 contains reconciliation statements of FMS revenue and expenditure to that on a public accounts basis for the 1991/92 Estimates of the federal and provincial governments.

The FMS data also differ from those of the government sector in the System of National Accounts (SNA). For example, employee pension funds and universal pension plans, such as the CPP and QPP, are considered to be part of government in the SNA but are presented separately from the government financial data in the FMS (and in the Public Accounts) and are not included in this publication.

Please note:

The Québec Bureau of Statistics (BSQ) will be publishing revenue and expenditure statistics for the Government of Québec on a Financial Management System basis. While the revenue and expenditure concepts are similar to those in this publication, the Québec statistics will be based on coverage of a greater proportion of the public sector than this publication. Statistics Canada's next publication on government revenues and expenditures on a Financial Management System basis will include a reconciliation of the Statistics Canada and BSQ statistics.

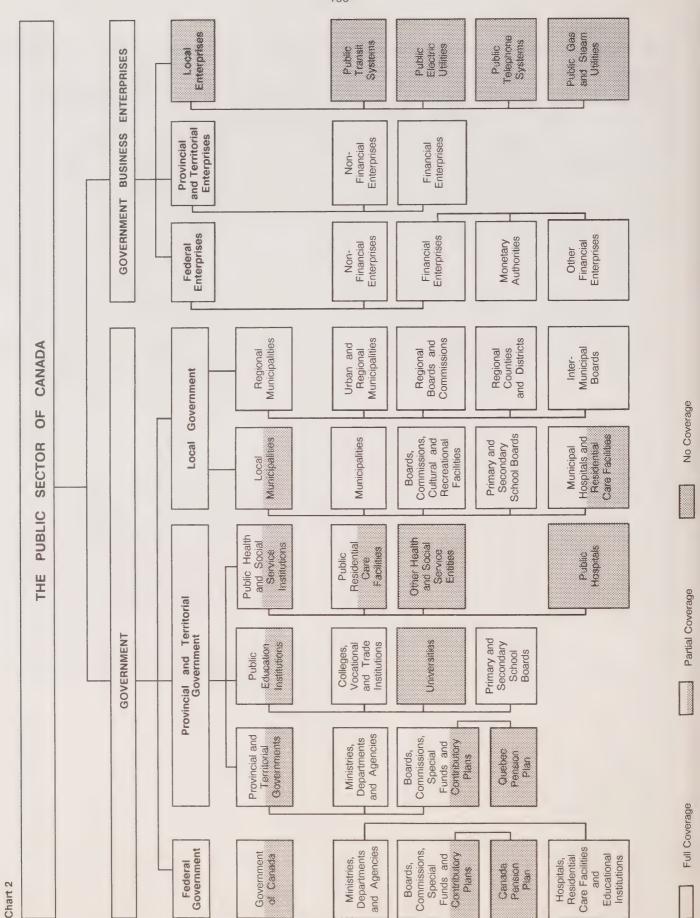

Comparabilité avec d'autres systèmes de statistique

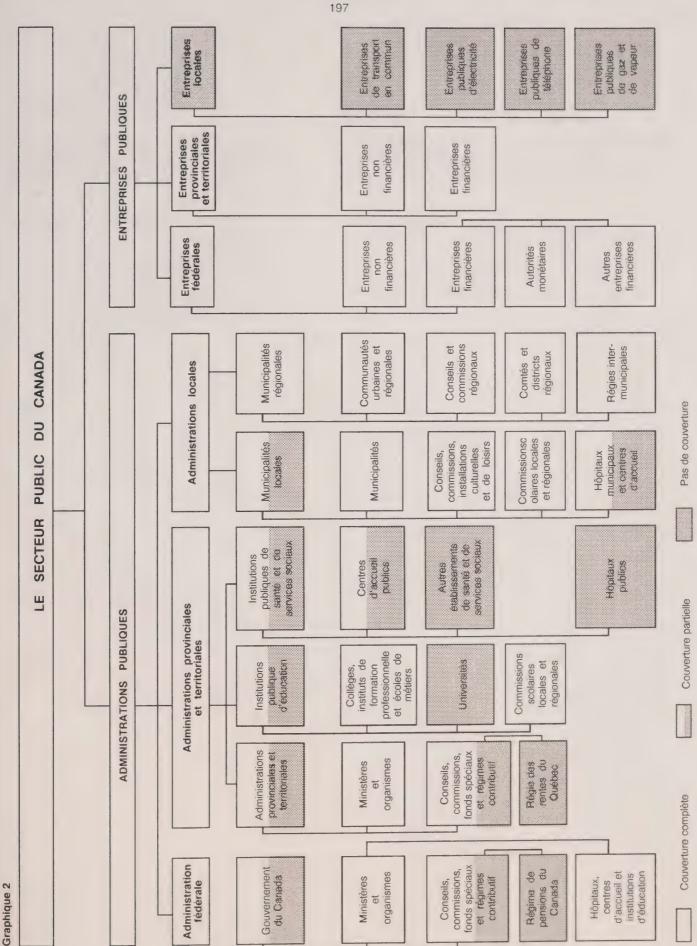

Le SGF est un système de comptabilité normalisé des finances de tous les niveaux d'administration. D'ordinaire, il n'est pas possible de comparer les systèmes de comptabilité individuels des administrations étant donné qu'ils sont représentatifs des politiques et des structures de chaque administration. Le SGF comprend non seulement les entités dont il est question dans les budgets mais également les autres organismes ou fonds spéciaux qui remplissent des fonctions gouvernementales. Les données du SGF ne concordent pas précisément avec celles des comptes publics diffusées par les administrations provinciales et fédérale. Vous trouverez à la Section 2 des états de rapprochement des recettes et des dépenses du SGF avec celles des comptes publics tirées des estimations de 1991-1992 des administrations fédérale et provinciales.

Les données du SGF diffèrent également de celles du secteur gouvernemental du Système de comptabilité nationale (SCN). Par exemple, dans le SCN, les fonds de pensions des employés et les régimes de pensions universels comme le RPC et le RRQ sont considérés comme faisant partie du secteur gouvernemental mais, dans le SGF (et dans les comptes publics), elles sont présentées séparément des données financières et administratives et n'entrent pas en ligne de compte dans la présente publication.

À noter:

Le Bureau de la statistique du Québec (BSQ) publiera les recettes et les dépenses publiques du Québec sur la base du système de gestion financière. Bien que les concepts liés aux recettes et aux dépenses soient semblables à ceux employés dans la présente publication, les statistiques du Québec sont fondées sur une plus large couverture du secteur public. La prochaine publication de Statistique Canada sur les recettes et les dépenses publiques, établies en fonction du système de gestion financière, comportera un rapprochement des statistiques du BSQ et de Statistique Canada.

Annex 2

Glossary of Terms

The following is a list of the terms used within the Financial Management System of Statistics Canada.

REVENUE CATEGORIES

Revenue is divided into two main categories: Own-Source Revenue and Transfer Payments From Other Levels of Government. Own-Source Revenues are those revenues which are levied by the particular level of government on their jurisdiction.

Own Source Revenue

1. Income Taxes

- a) Personal income taxes Encompasses general levies on income and capital gains of individuals and unincorporated businesses as well as special levies on income, such as a surtax, which governments put into effect from time to time.
- b) Corporation income taxes Includes general federal and provincial taxes on taxable profits of corporations. It also includes special taxes which are occasionally levied on profits of corporations.
- c) Tax on payments to non-residents This category includes the federal tax withheld at source on payments to non-residents (both individuals and corporations) of dividends, interest, rents, royalties, alimony, managerial fees and amounts arising from trusts and estates.

2. Property and Related Taxes

a) Real property - In Canada, taxation of real property (land and improvements) has been traditionally a local government preserve. However, some provinces have assumed services formerly carried out by local governments, e.g. education, health, welfare, justice and property value assessment, (such as New Brunswick and British Columbia), and are financing these services by real property taxes. Some provinces also levy real property taxes in territories that are not organized into local governments. In the statistical data on provincial governments, the amount shown as revenue from real property taxation is exclusive of amounts collected for and passed on to local governments and the local governments include the amount collected for and remitted to them by the provinces with the amount they collect themselves.

Glossaire

Voice une liste de certains termes utilisés en conjonction avec le système de gestion financière de Statistique Canada.

CATÉGORIES DE RECETTES

Il existe deux principales catégories de recettes : les recettes de sources propres et les paiements de transfert d'autres niveaux de gouvernement. Les recettes de sources propres sont les recettes perçues par un niveau de gouvernement donné, sur son secteur de compétence.

Recettes de sources propres

1. Impôts sur le revenu

- a) Impôts sur le revenu des particuliers Comprend les impôts généraux sur le revenu et les gains en capitaux des particuliers et des entreprises non constituées en sociétés, ainsi que les impôts spéciaux sur le revenu, tels qu'une surtaxe, que les administrations publiques mettent occasionnellement en vigueur.
- b) Impôts sur le revenu des corporations Comprend les impôts généraux levés par les administrations fédérale et provinciales sur les bénéfices imposables des corporations. On y trouve aussi les impôts spéciaux levés à l'occasion sur les bénéfices des corporations.
- c) Impôts sur certains paiements aux non-résidents Comprend l'impôt fédéral retenu à la source sur les paiements aux non-résidents (particuliers et corporations) de dividendes, d'intérêts, de loyers, de redevances, de pensions alimentaires, d'émoluments administratifs et de sommes provenant d'arrangements fiduciaires ou successoraux.

2. Impôts fonciers et impôts connexes

a) Taxes foncières générales - Au Canada, l'imposition des biens-fonds (terrain et construction) était réservée traditionnellement aux administrations locales. Cependant, certaines administrations provinciales ont pris en charge des services qui relevaient des administrations locales, comme l'enseignement, la santé, le bien-être, la justice et l'évaluation foncière (comme au Nouveau-Brunswick et en Colombie-Britannique) et financent ces services en imposant des taxes foncières. Certaines provinces prélèvent également ces taxes sur des territoires non organisés en administrations locales. Dans les statistiques sur les administrations provinciales, le produit des taxes foncières ne comprend pas les montants qui sont perçus pour les administrations locales ou qui leur sont versés. Dans les statistiques sur les administrations locales, le produit de ces taxes est constitué des sommes recueillies par les administrations locales elles-mêmes et des sommes perçues en leur nom par l'administration provinciale.

- b) Special assessments Are levies made by a municipality on a specific group of properties to pay for a service (e.g. the provision of a sidewalk) supplied to those properties only.
- c) Business Includes taxes levied on business in lieu of, or supplementary to, property taxes, except taxes on income or profits of such businesses which are classified under income taxes.
- d) Capital taxes Includes the taxes levied by provinces on the paid-up capital of corporations operating within their boundaries.
- e) Other Any other property related taxes.

3. Consumption Taxes

- a) General sales The proceeds of the federal manufacturers sales tax and the Goods and Services Tax (beginning in fiscal year 1990/91) and of provincial retail sales taxes.
- Motive fuel Includes the proceeds of specific taxes on gasoline, on aviation and diesel fuel and on propane or other substances when used as motive fuel.
- c) Alcoholic beverages Includes all forms of special levies, excise tax, excise duty or other, imposed on the production and sale of alcoholic beverages. Where a general sales tax is applicable to alcoholic beverages, the related proceeds are classified under the "general sales taxes" caption. Similarly, customs duties on imported alcoholic beverages are classified under the "customs duty" heading.
- d) Tobacco Accounts for special levies (e.g. excise tax, excise duty and provincial specific taxes) on the production and sale of tobacco products. General sales taxes and customs duties applicable to tobacco products are included under their respective headings.
- e) Amusements and entertainments Includes tax receipts from admissions to theatres, cinemas, recreational, cultural or other entertainment activities.
- f) Race track betting Encompasses taxes levied by provincial governments on amounts wagered on horse races.
- g) Air transportation Accounts for the tax levied by the federal government on the price of air transportation purchased either in Canada or outside the country for the use of air transportation facilities in Canada.
- h) **Customs duties** Applies only to the federal level and takes into account the proceeds from levies on commodities imported into Canada.

- b) Taxes foncières particulières Comprend les impôts levés par une municipalité sur un groupe particulier de propriétés à l'égard d'un service (par ex. l'installation de trottoirs) rendu à ces propriétés exclusivement.
- c) Taxes d'affaires Comprend les taxes perçues auprès des entreprises à la place ou en sus de l'impôt foncier, à l'exception des impôts sur le revenu ou sur les bénéfices de ces entreprises qui sont classés sous la rubrique des impôts sur le revenu.
- d) Impôts sur le capital Comprend les impôts prélevés par les provinces sur le capital versé des corporations en activité à l'intérieur de leurs frontières.
- e) Autres Tout autre impôt relatif à la propriété foncière.

3. Taxes à la consommation

- a) Taxes générales de vente Comprend la taxe fédérale de vente levée sur les fabricants et la taxe sur les produits et les services (entrée en vigueur à l'exercice 1990-1991) et la taxe provinciale sur les ventes au détail.
- b) Taxes sur les carburants Comprend les taxes particulières sur l'essence, le carburant pour aéronefs et le diesel et sur le gaz propane ou d'autres produits utilisés comme carburant.
- c) Taxes sur les boissons alcoolisées Comprend tous les impôts particuliers, droits et taxes d'accise ou autres, levés sur la production et la vente de boissons alcoolisées. Toutefois, lorsque les boissons alcoolisées sont assujetties à la taxe générale de vente, le produit qui en est tiré est classé dans la catégorie "taxes générales de vente". De même, les droits de douane sur les boissons alcoolisées importées sont classés sous la rubrique "droits de douane".
- d) Taxes sur le tabac Comprend les taxes spéciales (taxes et droits d'accise et taxes provinciales précises) levées sur la production et la vente des produits du tabac. Les taxes générales de vente et les droits de douane applicables aux produits du tabac sont classés sous leurs rubriques appropriées.
- e) Taxes sur les amusements et les spectacles -Comprend les taxes perçues sur les entrées aux théâtres et aux cinémas, de même que sur les activités récréatives, culturelles et autres.
- f) Taxes afférentes aux champs de course -Comprend les taxes levées par les administrations provinciales sur les sommes pariées aux courses de chevaux.
- g) Taxes sur le transport aérien Comprend les taxes levées par l'administration fédérale sur le prix des billets d'avion achetés au Canada ou à l'étranger pour l'utilisation des installations aéroportuaires au Canada.
- h) **Droits de douane** S'applique au niveau fédéral seulement et comprend le produit des droits imposés sur les marchandises importées au Canada.

i) Other - Accounts at the federal level for the yield of special excise levies on jewellery and watches, toilet preparations and an assortment of sundry items. At the provincial level, it includes the proceeds from special taxes on telecommunications, traveller accommodations, meals, electricity, gas, coal, and fuel oil and on other goods and services.

4. Health and Social Insurance Levies

This category includes a series of revenue sources whose proceeds are earmarked to finance health and social insurance programs. Included among these are: health insurance premiums and other taxes for the specific use of financing hospitalization and medical care programs; as well as specific levies for social insurance programs such as unemployment insurance contributions (both employer and employee) and workers' compensation contributions.

- a) Health insurance premiums and taxes Includes premiums or taxes, such as the Québec payroll tax, levied by some provinces, the proceeds of which are used specifically in financing their hospitalization and medical care programs. Since these levies generally apply to both hospitalization and medical care, it is not possible to identify the proceeds applicable to individual programs. Payroll taxes levies for multiple purposes are included in "Miscellaneous taxes".
- b) Unemployment insurance contributions Covers employer (other than federal government) and employee contributions toward income maintenance payments under the federal unemployment insurance program.
- c) Workers' compensation contributions

 Comprises non-government employer contributions to provincially-operated workers' compensation schemes. Most governments act as their own insurers against risks of employee injury in the course of duty and do not contribute to their workers' compensation programs.

5. Petroleum and Natural Gas Taxes

Included are levies on domestic and imported petroleum products imported or petroleum products processed or consumed in Canada, oil export charges, petroleum compensation charges and other taxes on petroleum, natural gas and gas liquids.

6. Miscellaneous Taxes

 a) Taxes on insurance premiums - Includes taxes on fire insurance premiums, the provincial taxes on gross premium incomes of insurance companies and the policyholder premium taxes. i) Autres - Comprend, au niveau fédéral, les taxes d'accise spéciales sur les bijoux et les montres, les produits de toilette et un ensemble d'articles divers. Comprend, au niveau provincial, le produit de taxes spéciales sur les télécommunications, l'hébergement, les repas, l'électricité, le gaz, le charbon et le mazout, et sur la vente d'autres biens et services.

Cotisations aux régimes d'assurance-maladie et d'assurance sociale

Cette catégorie comprend une variété de sources de revenus dont le produit est destiné précisément au financement de programmes de services sociaux et de santé. Mentionnons les cotisations aux régimes d'assurance-maladie et d'autres taxes destinées précisément au financement de programmes de soins médicaux et hospitaliers, des taxes spéciales pour les programmes d'assurance sociale telles que les cotisations à l'assurance-chômage (employeurs et employés) et aux caisses des accidents de travail.

- a) Primes et taxes d'assurance-maladie Comprend les primes ou taxes, telles que l'impôt sur la feuille de paie du Québec, levées par certaines provinces et dont le produit est destiné précisément au financement de leurs programmes de soins médicaux et hospitaliers. Étant donné que les primes et les taxes sont généralement perçues pour l'ensemble des deux programmes, on ne peut distinguer le produit afférent à chacun de ceux-ci. Les impôts sur la feuille de paie levés dans des buts multiples figurent sous la rubrique "Impôts divers".
- b) Cotisations à l'assurance-chômage Comprend les cotisations des employeurs (sauf l'administration fédérale) et des employés au régime fédéral d'assurance-chômage en vue d'assurer un revenu.
- c) Cotisations aux caisses des accidents du travail Comprend les cotisations des employeurs, autres que l'administration publique, aux régimes provinciaux d'indemnisation des accidents du travail. La plupart des administrations publiques assurent elles-mêmes les risques d'accidents corporels des employés dans l'exercice de leurs fonctions et ne contribuent pas à leurs propres régimes d'indemnisation des accidents du travail.

5. Taxes sur le pétrole et le gaz naturel

Comprend les taxes perçues sur les produits du pétrole canadiens et importés ou sur les produits du pétrole transformés ou consommés au Canada, les redevances d'exportation sur le pétrole, les redevances d'indemnisation pétrolière et d'autres taxes sur le pétrole, le gaz naturel et les liquides extraits du gaz.

6. Impôts divers

 a) Taxes sur les primes des compagnies d'assurance

 Comprend les taxes perçues sur les primes d'assurance contre les incendies, les taxes provinciales sur le revenu brut en primes perçues par les compagnies d'assurance et les taxes payées par les titulaires de police.

- b) Payroll taxes Includes all general purpose provincial payroll taxes and excludes the payroll tax levied by Québec which is directed to financing health insurance.
- c) Other Includes taxes not elsewhere specified.

7. Natural Resource Revenue

These are revenues derived from the exploration, development and exploitation of natural resources, other than those received under income tax legislation. These revenue are classified by five sub-classifications: Fish and Game, Forests, Mines, Water Power, Other.

- a) Fish and game Includes revenue from hunting and fishing licences and permits, royalties on furs and fishing royalties.
- b) Forests Includes revenue from taxes on logging operations, leases and rentals of Crown timber lands, timber berth dues, stumpage dues and timber royalties, timber and fuelwood licences and permits, timber sales, scaling fees, leasing and contract fees, selective cutting fees, log-driving charges, management and forest protection charges and other revenues derived from forestry.
- c) Mines Provides for revenues from mining operations in respect of the production of metallic and non-metallic minerals, fuels (with the exception of oil and gas which form a separate category) and structural materials, i.e. quarries (sand and gravel and stone). It does not include manufactured products related to mining, such as clay, cement and lime. Mining revenues consist of receipts from taxes on mining operations, taxes levied pursuant to mineral taxation acts; taxes on acreages, concessions, claim leases, exploitation licences and permits; leases, rentals, and other permits and royalties on mineral production; miners certificates and licences.
- d) Water power Includes revenue from water power privileges, water storage reservoirs, water rental contributions, fees and royalties on hydro-electricity generated.
- e) Other Comprises revenue from rentals and royalties not included elsewhere such as park and camp ground permits, fees, rentals, concessions and sales and miscellaneous natural resource taxes, fees and charges.

- b) Impôts sur la feuille de paie Comprend tous les impôts provinciaux à ce titre, à l'exception de celui prélevé au Québec et qui sert à financer l'assurance-maladie.
- c) Autres Comprend les taxes non précisées ailleurs.

7. Recettes tirées des ressources naturelles

Il s'agit des recettes tirées de l'exploration, de la mise en valeur et de l'exploitation des ressources naturelles, à l'exception de celles visées par une loi de l'impôt sur le revenu. Ces recettes sont réparties selon cinq sous-catégories : chasse et pêche, forêts, mines, ressources hydrauliques et autres.

- a) Chasse et pêche Comprend les recettes de la délivrance de permis et de licences de chasse et de pêche, ainsi que les redevances sur les fourrures et sur la pêche.
- b) Forêts Comprend les recettes des impôts sur l'exploitation forestière, de la location de terres forestières de la Couronne, des droits de concessions forestières, des droits de coupe et des redevances sur le bois, des permis et licences sur le bois-d'oeuvre et sur le bois de chauffage, des ventes de bois, des frais de mesurage, des droits rattachés à des baux ou à des contrats, des frais de coupe sélective, des frais de flottage du bois, des frais de gestion et de protection des forêts, ainsi que d'autres recettes tirées du secteur forestier.
- c) Mines Comprend les recettes d'exploitation minière relative à la production de minerais métalliques et non métalliques, de combustibles (à l'exception du pétrole et du gaz qui forment une sous-catégorie distincte), et des matériaux de gros oeuvre extraits des carrières (sable, gravier et pierres). Ne comprend pas les recettes tirées de produits manufacturés liés à l'exploitation minière comme l'argile, le ciment et la chaux. Les recettes de l'exploitation minière sont formées de taxes sur la production minière, de taxes prescrites par les lois sur l'imposition des minerais, de taxes sur les terrains et les concessions, de droits de bail, de permis et de licences d'exploitation, de baux, locations et autres permis et redevances sur la production minière, et de certificats et de permis de mineurs.
- d) Ressources hydrauliques Comprend les recettes tirées des concessions d'énergie hydraulique, des réservoirs d'eau, des contributions pour la location de ressources hydrauliques, de droits et de redevances sur l'électricité produite.
- e) Autres Comprend les recettes provenant de loyers et les redevances non comprises dans les postes susmentionnés comme les permis, les droits, les loyers, les concessions et les ventes se rapportant à des parcs et terrains de camping, et de divers impôts, droits et frais relatifs aux ressources naturelles.

8. Privileges, Licences and Permits

This classification includes fees for privileges, licenses and permits under four general groupings: liquor control and regulation; motor vehicles; concessions and franchises; and other.

9. Sales of Goods and Services

As a provider of public goods and services, government engages in transactions of a commercial nature with organizations or individuals in the private sector and with other governments. This classification is broken down into two components, namely intergovernment and general. Proceeds from these transactions are recorded under this classification except those concerning natural resources which are included under "natural resource revenue".

10. Return on Investment

A distinction is made between return on government investments in its own enterprises and on other investments.

- a) Own enterprises includes remitted profits, interest and dividends from government-owned enterprises.
- b) Other return on investment consists of four sub-categories: interest, dividends, profits on foreign exchange transactions, and a residual "other".

11. Other Revenue from Own Sources

- a) Contributions to government operated benefits plans - Employee contributions to death benefit plans.
- b) **Bullion and coinage** Gains of the federal government on bullion and coinage.
- c) Interest and penalties on taxes for non-payment.
- d) Other fines and penalties Comprises fines and penalties arising from infractions of laws, by-laws and ordinances, whether civil or criminal.
- e) Miscellaneous Provides for receipts not elsewhere classified.

8. Privilèges, licences et permis

Ces droits se divisent en quatre composantes : contrôle et réglementation du commerce des alcools, véhicules automobiles, concessions et franchises, et autres.

9. Ventes de biens et de services

En leur qualité de fournisseur de biens et de services à la collectivité, les administrations publiques effectuent des transactions de nature commerciale avec des organismes et des particuliers du secteur privé, de même qu'entre elles. Les ventes de biens et de services se divisent en deux composantes : "à d'autres administrations publiques" et "à la collectivité". Le produit de ces transactions s'insère dans cette catégorie, sauf les transactions portant sur les ressources naturelles qui relèvent de la catégorie "recettes tirées des ressources naturelles".

10. Revenus de placements

On fait une distinction entre les revenus de placements que l'administration publique tire de ses propres entreprises et ceux qu'elle tire d'autres sources.

- a) Entreprises publiques propres Comprend les bénéfices remis, les intérêts et les dividendes des entreprises publiques.
- b) Autres revenus de placements Comprend quatre sous-catégories : intérêts, dividendes, bénéfices des opérations en devises étrangères et autres.

11. Autres recettes de sources propres

- a) Cotisations aux régimes d'avantages sociaux de l'État - Cotisations des employés à des régimes de prestations de décès.
- b) **Lingots et monnayage** Bénéfices de l'administration fédérale tirés des lingots et du monnayage.
- c) Intérêts et pénalités sur les impôts Intérêts et pénalités tirés des impôts non payés.
- d) Autres amendes et pénalités Amendes et pénalités imposées en raison d'infractions aux lois, règlements et décrets, en matière civile ou criminelle.
- e) Autres recettes diverses Recettes non classées ailleurs.

Transfers

General purpose transfers from other levels of government and their enterprises

These are general transfers from one level of government to another which are unconditional or are not earmarked for a specific subject-matter purpose. The principal transfers are as follows: statutory subsidies to provincial and territorial governments; transfers to provinces of share of federal corporation income tax on privately-owned power utilities, and shares of federal tax on corporation undistributed income; equalization transfers made by the federal government to reduce inter-provincial disparities in per capita fiscal capacity and grants in lieu of property taxes.

2. Specific purpose transfers from other levels of government and their enterprises

These are transfers from one level of government to another to meet the costs of specific functions or activities. The main transfers included here are transfers from the federal government to provincial governments for health, post-secondary education and social service expenditures.

EXPENDITURE CATEGORIES

Function

In the Financial Management System, government expenditures are classified in terms of the "function" or service provided. The function classification indicates the ultimate purpose of an expenditure. Functional classifications permit trends in government outlays on particular functions to be examined over time. The definitions of the functions are:

1. General Services

Overall expenditures for the executive, legislature, and law making functions that are within the public sector. These expenditures include salaries for the Governor General, Lieutenant Governors, the Prime Minister, Premiers, Cabinet Ministers, elected officials, as well as outlays related to the general administration of their offices. Expenditures on central activities that cannot be attributed to any subject-specific function, such as central accounting or auditing services, are also included, as are contributions to government employee benefit plans.

2. Protection of Persons and Property

All outlays related to the security of individuals and property, as well as the security of the nation as a whole. The costs of policing, fire-fighting, law courts, and correction and rehabilitation, as well as national defence are included.

Transferts

Transferts à des fins générales en provenance d'autres administrations publiques et de leurs entreprises

Comprend les transferts à des fins générales d'un niveau de gouvernement à l'autre qui sont inconditionnels et non attribués à une fin précise. La ventilation des principaux transferts est la suivante : subventions légales versées aux provinces et aux territoires, transferts aux provinces de la part de l'impôt fédéral sur le revenu prélevé sur les entreprises privées de services publics et sur le revenu non réparti des corporations, transferts de paiements de péréquation de l'administration fédérale pour réduire les disparités interprovinciales de la capacité fiscale par habitant, et subventions tenant lieu d'impôts fonciers.

2. Transferts à des fins particulières en provenance d'autres administrations publiques et de leurs entreprises

Comprend les transferts d'un niveau de gouvernement à l'autre visant à financer des fonctions ou activités précises. Les principaux transferts sont les transferts versés par l'administration fédérale aux administrations provinciales au titre de la santé, de l'enseignement postsecondaire et des services sociaux.

CATÉGORIES DE DÉPENSES

Fonction

Dans le système de gestion des finances publiques, les dépenses des administrations publiques sont classées en fonction des services assurés. La classification selon la fonction précise l'objet ultime d'une dépense. Le classement par fonction permet d'examiner, dans le temps, les tendances dans les sorties de fonds faites par les administrations pour des fonctions particulières. Voici les définitions des fonctions:

1. Services généraux

Dépenses globales pour les fonctions du pouvoir exécutif et du pouvoir législatif qui sont dans le secteur public. Ces dépenses comprennent le salaire du gouverneur général, des lieutenants gouverneurs, du premier ministre, des premiers ministres provinciaux, des ministres, des administrateurs élus, ainsi que les sorties de fonds reliées à l'administration générale du bureau de chacune de ces personnes. Les dépenses consacrées aux activités centrales qui ne peuvent être attribuées à une fonction propre à un sujet particulier, comme les services de comptabilité centrale ou de vérification centrale, sont aussi inclus, tout comme les contributions aux régimes d'avantages sociaux des employés des administrations publiques.

2. Protection de la personne et de la propriété

Toutes les sorties de fonds reliées à la sécurité de la personne et de la propriété, ainsi qu'à la sécurité du pays dans son ensemble. Les coûts reliés à la police, à la lutte contre l'incendie, aux tribunaux, aux services de correction et de réhabilitation ainsi qu'à la défense nationale sont inclus dans cette fonction.

3. Transportation and Communications

All expenditures related to the planning, development, acquisition, construction, operation, maintenance, and regulation of transportation and communications systems. These systems include air, road, rail, and water transportation, as well as telecommunications and postal services.

4. Health

All expenditures related to: hospital and medical insurance programs; delivery of hospital medical (including public health), and dental services; disease control and prevention and peripheral services such as laboratories.

5. Social Services

Expenditures on a wide variety of programs and services provided in whole or in part by the public sector that support the socio-economic well-being of individuals and families. Included in these programs are some non-contributory pensions schemes such as the Old Age Security program (OAS), Guaranteed Income Supplement (GIS), Unemployment Insurance, Workers' Compensation, Family Allowances, Veterans Benefits and other social welfare assistance or social welfare services, etc.

6. Education

Outlays for planning, developing, operating, providing, and improving educational systems and services. The systems and services include elementary, secondary, and post-secondary education and skills retraining and upgrading.

7. Resource Conservation and Industrial Development

Expenditures on services related to agriculture, fish and game, forests, mines, oil and gas, water resources, as well as tourism, trade, and industry.

8. Environment

Outlays on the physical environment, included in this function are expenditures related to water supply and purification, garbage and waste management, sewage collection and disposal, and pollution control.

9. Recreation and Culture

Expenditures in developing, improving, operating and supporting leisure facilities, including sports and recreational facilities, libraries, museums, heritage institutions, parks, and the performing and visual arts.

3. Transports et communications

Toutes les dépenses reliées à la planification, à l'éclaboration, à l'acquisition, à la construction, à l'exploitation, à l'entretien et à la réglementation des systèmes de transport et de communication. Ces systèmes comprennent le transport aérien, le transport routier, le transport ferroviaire et le transport par eau ainsi que les services de télécommunications et le service postal.

4. Santé

Toutes les dépenses reliées aux programmes hospitaliers et aux régimes d'assurance-maladie, à la prestation des services hospitaliers, médicaux (y compris ceux reliés à la santé publique) et dentaires; au contrôle et à la prévention des maladies ainsi qu'aux services auxiliaires comme les laboratoires.

5. Services sociaux

Les dépenses consacrées à une gamme étendue de programmes et de services fournis en tout ou en partie par le secteur public qui favorisent le bien-être socio-économique des personnes et des familles. Ces programmes comprennent certains régimes de pensions sans participation tels que le Programme de la sécurité de la vieillesse (SV), le Programme du supplément de revenu garanti (SRG), le Programme de l'Assurance-chômage, les indemnisations des accidents du travail, les allocations familiales, les avantages destinés aux anciens combattants et d'autres services d'assistance sociale, etc.

6. Éducation

Sortie de fonds pour la planification, l'élaboration, l'exploitation, la prestation et l'amélioration des systèmes et services éducatifs. Les systèmes et services comprennent l'enseignement primaire, secondaire et postsecondaire ainsi que les cours de recyclage.

7. Conservation des ressources naturelles et développement industriel

Dépenses consacrées aux services portant sur l'agriculture, la pêche et la chasse, les forêts, les mines, le pétrole et le gaz, les ressources en eau ainsi que le tourisme, le commerce et l'industrie.

8. Environnement

Sorties de fonds consacrées au milieu physique, cette fonction comprend les dépenses pour la purification et la distribution de l'eau, pour la gestion des déchets, pour la collecte et l'évacuation des eaux usées ainsi que pour le contrôle de la pollution.

9. Loisirs et culture

Dépenses consacrées à l'élaboration, à l'amélioration et à l'exploitation d'installations de loisirs, y compris les établissements sportifs et les centres de loisirs, les bibliothèques, les musées, les institutions du patrimoine, les parcs ainsi qu'aux arts d'interprétation et aux arts visuels et à venir en aide à ces installations et aux organismes qui oeuvrent dans ce domaine.

10. Labour, Employment and Immigration

Expenditures concerned with the development, and promotion of labour relations and fair employment conditions (labour standards), as well as immigration programs. Also included are expenditures on programs for job creation, acquisition, and retention.

11. Housing

Expenditures to aid the construction of new housing and the renovation and improvement of existing housing are included. Also included are expenditures on research related to housing operations and assistance to new home buyers.

Transfers to housing corporations that are considered government enterprises are included under transfers to own enterprises. Currently all federal and provincial housing corporations are classified as government enterprises with the exception of Nova Scotia and Québec housing corporations. However, the classification of all housing corporations is under review

12. Foreign Affairs and International Assistance

Expenditures pertaining to Canada's formal diplomatic relations with other sovereign states, fostering economic development, and improvement of social conditions in foreign countries. Expenditures on trade promotion abroad and cultural exchanges with foreign countries are classified under "Resource Conservation and Industrial Development" and "Recreation and Culture," respectively. Expenditures on military assistance, including participation in air, ground, and sea military actions as regards foreign nations are included under "Protection of persons and property."

13. Regional Planning and Development

Expenditures related to regional economic development, planning and zoning, and community development. Included are all authorities, boards and commissions established to plan and promote the development of particular regions.

14. Research Establishments

Expenditures of major research organizations such as the National Research Council and similar provincial or territorial agencies whose primary purpose is pure or applied scientific research and the promotion of developments resulting from such activities. Also included are grants to individuals and non-government bodies engaged in similar research.

10. Travail, emploi et immigration

Dépenses consacrées au développement et à l'encouragement des relations du travail et des pratiques loyales en matière d'emploi (normes de travail), ainsi qu'aux programmes d'immigration. Les dépenses relatives aux programmes de création, d'acquisition et de conservation d'emplois sont également incluses.

11. Logement

Il s'agit des dépenses visant à favoriser la mise en chantier de nouveaux logements et la rénovation et l'amélioration des logements déjà existants. Les dépenses pour la recherche dans le domaine de l'exploitation des logements et l'aide aux nouveaux acheteurs de résidences sont aussi comprises sous cette rubrique.

Les transferts faits aux corporations de logement qui sont des entreprises publiques sont inclus sous la rubrique Transferts aux entreprises publiques. Présentement, toutes les corporations de logement publiques fédérales et provinciales sont classées comme des entreprises publiques sauf pour les corporations de logements de la Nouvelle Écosse et du Québec. Cependant, la classification de toutes les corporations de logement sera révisée.

12. Affaires extérieures et aide à l'étranger

Dépenses consacrées aux relations diplomatiques officielles du Canada avec d'autres pays souverains, en vue de stimuler le développement économique et d'améliorer les conditions sociales dans des pays étrangers. Les dépenses portant sur la stimulation du commerce à l'étranger et sur les échanges culturels avec des pays étrangers sont classées sous "Conservation des ressources naturelles et développement industriel" et "Loisirs et culture" respectivement. Les dépenses d'assistance militaire, y compris la participation à des opérations militaires aériennes, terrestres et navales en ce qui concerne des nations étrangères figurent sous "Protection des personnes et des biens".

13. Planification et aménagement des régions

Dépenses consacrées au développement économique régional, à la planification et au zonage ainsi qu'au développement communautaire. Y figurent toutes les administrations, toutes les commissions et tous les offices établis en vue de planifier et de promouvoir le développement de régions particulières.

14. Établissements de recherches

Dépenses des principaux organismes de recherches comme le Conseil national de recherches et les organismes provinciaux ou territoriaux semblables dont l'objet premier est la recherche scientifique pure ou appliquée ainsi que l'encouragement des progrès découlant de telles activités. Y figurent aussi les subventions accordées à des personnes et à des organismes non gouvernementaux qui effectuent de la recherche de même nature.

INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then *Canadian Social Trends* is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, *Canadian Social Trends* looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, *Canadian Social Trends* provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, *Canadian Social Trends* also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

CANADIAN SOCIAL TRENDS

(Catalogue No. 11-008E) is \$34 annually in Canada, US\$40 in the United States and US\$48 in other countries.

To order, write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster service, fax your order to 1-613-951-1584. Or call toll free 1-800-267-6677 and use your VISA or MasterCard.

VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEÜVRE ORIGINALE?

Alors **Tendances sociales canadiennes** est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, *Tendances sociales canadiennes* brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, **Tendances sociales canadiennes** dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

Tendances sociales canadiennes présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

TENDANCES SOCIALES CANADIENNES

PICK A TOPIC... ANY TOPIC

The 1992 Statistics Canada Catalogue is your guide to the most

complete collection of facts and figures on Canada's changing business, social and economic environment. No

matter what you need to know, the Catalogue will point you in the right direction.

From the most popular topics of the day — like employment, income, trade, and education — to specific research studies — like mineral products shipped from Canadian ports and criminal vicitimization in urban areas — you'll find it all here. We've even included a selection of key statistics from recent publications.

... the 1992 Statistics Canada Catalogue will help you get your bearings...

The Catalogue puts all this information at your fingertips.
With the expanded index, you can search by subject, author or title — even periodical articles are indexed.

And for 1992, a separate index has been added for all our electronic products.

The Catalogue has everything you need to access all Statistics
Canada's products:

- descriptions of over 80 new titles, plus succinct abstracts of the over 800 titles and 11 map series already produced;
- a preview of upcoming 1991 census products;
- easy ordering information to avoid delays;
- electronic products in a variety of media, and advice on getting expert assistance and on-line searches;
- tabs to each section so you can immediately flip to the information you need.

...time and time again

To make sure that the Catalogue stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today — you'll be lost without it.

CHOISISSEZ UN SUJET... N'IMPORTE LEQUEL

Le Catalogue de Statistique
Canada 1992 est votre guide pour la
collection la plus complète de
faits et de chiffres sur le monde,
en constante évolution, du
commerce, du milieu social et
de l'économie. Peu importe ce
que vous voulez
savoir, il vous
mettra sur la

Des sujets actuels les plus populaires
— comme l'emploi, le revenu, le
commerce et l'éducation, à des
études de recherche particulières,
comme les
produits minéraux
expédiés des ports
canadiens et la
victimisation dans les
régions urbaines —
vous trouverez tout
dans ce document.

bonne piste.

Nous avons même inclus une sélection des plus importantes statistiques provenant des plus récentes publications.

...le Catalogue de Statistique Canada 1992 vous aidera à vous orienter...

Le Catalogue vous met tous ces renseignements sous la main.

L'index augmenté vous permet de chercher par sujet, auteur ou titre — les articles de périodiques sont même indexés. Et pour 1992, on a ajouté un index séparé pour tous nos produits électroniques.

Le Catalogue a tout ce qu'il vous faut pour vous procurer les produits de Statistique
Canada:

- descriptions de plus de 80 nouveaux titres et courts résumés des 800 titres et plus et des 11 séries de cartes déjà disponibles;
- premier aperçu des futurs produits du recensement de 1991;
- renseignements clairs pour passer les commandes afin d'éviter les délais;
- produits électroniques sur supports divers et conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;
- systèmes d'onglets pour chaque section sur la couverture arrière pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le Catalogue puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui vous ne pourrez plus vous passer de lui.

JOINTHE WITH THE MOST USEFUL AND ATTRACTIVE CANADA YEAR BOOK EVER PUBLISHED.

On the occasion of the nation's 125th anniversary of Confederation, the 1992 Canada Year Book takes a unique look at the fascinating highlights in the development of Canada since 1867.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the 1992 Canada Year Book is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

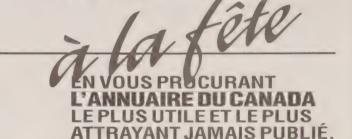

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos

historical perspectives on Canada's past

• 22 chapters, 607 pages bound in deluxe hard cover

Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

- THE LAND
- THE PEOPLE
- THE NATION
- THE ECONOMY
- ARTS AND LEISURE

L'Annuaire du Canada de 1992, qui marque le 125e anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.

Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
 - 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
- LA POPULATION
 - LA NATION
 - L'ÉCONOMIE
 - LES ARTS ET LES LOISIRS

PICTURE PERFECT COVER TO COVER!

In a unique combination of beautiful photography and informative text, Canada: A Portrait chronicles Canadian achievements in fields as diverse as economics, arts and culture. The latest facts and figures on our environment and people are complemented with over 200 full-colour photographs by award-winning Canadian photographers.

A best-seller for over 50 years, Canada: A Portrait is perfect for:

- * the business sector as a corporate gift
- * your home library or as a coffee table book
- * students and teachers as a reference tool
- * the media as a resource
- * tourists both at home and abroad
- * the armchair traveller

In a convenient 6" × 9" format and 260 pages, the 53rd edition of Canada: A Portrait (Cat. no. 11-403E) is available in separate English and French editions.

For the first time Canada: A Portrait is available in a deluxe hardcover, priced at \$33.00 in Canada, US \$39.95 in the United States and US \$45.95 in other countries; as well as our traditional softcover, priced at \$25.00 in Canada, US \$29.95 in the United States and US \$34.95 in other countries.

UN GRAND LIVRE À L'IMAGE D'UN GRAND PAYS!

Par sa combinaison unique de belles photographies et de textes informatifs, Un Portrait du Canada fait la chronique des réalisations canadiennes dans des domaines aussi divers que l'économie, les arts et la culture. Les derniers événements et chiffres sur notre environnement et notre société sont complétés par plus de 200 photographies en couleur prises par des photographes canadiens renommés.

Un best-seller depuis plus de 50 ans, *Un Portrait du Canada* est un ouvrage idéal pour:

- * les entreprises, comme cadeau à offrir
- vous, que vous le gardiez à portée de la main ou le rangiez dans votre bibliothèque personnelle
- * les étudiants et les enseignants, comme ouvrage de référence
- * les gens des médias, comme outil d'information
- * les touristes, au Canada et à l'étranger
- * ceux qui préfèrent voyager sans quitter leur fauteuil

La 53e édition d'*Un Portrait du Canada* (nº 11-403F) est disponible en français et en anglais. Elle est offerte dans un format pratique de 15 cm sur 22,5 cm et contient 260 pages.

Pour la première fois, cette publication est offerte en format de luxe à couverture rigide au prix de 33 \$ au Canada, 39,95 \$ US aux États-Unis, et 45,95 \$ US dans les autres pays; elle est aussi disponible en édition à couverture souple au prix de 25 \$ au Canada, 29,95 \$ US aux États-Unis, et 34,95 \$ US dans les autres pays.
